EASY WORK

"Love lightens labor," the saying runs, and in a sense it is true. But even love cannot lighten labor or make it easy for the woman who is in constant suffering from inflammation, bearing-down pains or other womanly diseases. The one thing that can make work easy for women is sound health, and Dr. Pierce's Favorite Prescription is the thing that will give sound health to sick women.

Dr. Pierce has so much faith in his "Prescription" that he offers to pay \$500 in legal money of the United States for any case of Leucorrhoea, Female Weakness, Prolapsus, or Falling of Womb which he cannot cure. All he asks is a fair and reasonable trial of his means of cure.

"I suffered from female weakness for five months," writes Miss Belle Hedrick, of Nye, Putnam Co., W. Va. "I was treated by a good physician but he never seemed to do me any good. I wrote to Dr. R. V. Pierce for advice, which I received, telling me to take his 'Favorite Prescription' and 'Golden Medical Discovery.' When I had used the medicines a month, my health was much improved. It has continued to improve until now I can work at almost all kinds of housework. I had scarcely any appetite, but it is all right now. Have gained several pounds in weight. Dr. Pierce's medicines have done wonderfully well here. I would advise all who suffer from chronic diseases to write to Dr. Pierce."

"Favorite Prescription" makes weak women strong, sick women well.

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the paper-covered book, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

WHALES AS THEY DIVE.

Something About the Habits of the Ocean Monsters.

Both whalers and naturalists have usually held that when whales "sound" they descend to great depths, says Knowledge. One writer on the subject estimates that the larger members of the group dive fully a thousand yards. In a memoir published in Belgium Dr. Racovitz challenges this belief and states that in his opinion 100 yards is the maximum depth to which any whale can dive and that many species cannot reach anything like that limit. Says the writer:

Why should whales want to go to such depths? All whales sound for the purpose of obtaining food, and in the profound darkness of 1,000 yards what food could they get? Those species which feed on animalcules might, perhaps, obtain what they want. But how about the species which feed on fishes and cuttles? At a depth of 1,000 yards they certainly could not use their eyes to detect nonluminous species, and they have no evidence whatever that they feed on the self-luminous deep sea fish and cuttles. If, indeed, there be any of the latter. On the contrary, the available evidence indicates that they feed on ordinary light dwelling fishes and cuttles which live in much shallower zones. But this is not all. It is known that the effects of a pressure of more than three atmospheres prove fatal to human life; and, although we may believe that whales can stand treble this pressure, or nine atmospheres, which would occur at about ninety yards' depth, is it conceivable that they could resist the effect of ten times the latter pressure, or ninety atmospheres? Moreover, does it seem possible that a whale whose body is only slightly heavier than water at ordinary pressure could exert the muscular force necessary to propel that body to a depth of 1,000 yards?

COLD WAVES.

They Purify the Atmosphere and Benefit the Human System.

The cold wave, so much dreaded by most people, is really a blessing in disguise. It charges the atmosphere with fresh oxygen and a surplus of free electricity, which produces a most exhilarating and beneficial effect upon mankind. Torpid energies are aroused, physical vigor and resistance increased, by the advent of a cold wave to such an extent that any incidental damage is more than made up for.

The American climate has always been recognized as a strong factor in causing the aggressiveness and enterprise which have lifted our people into the first rank among nations and made us commercially supreme. The cold wave, with its results of increased energy and vigor, is a meteorological phenomenon peculiar to this country. The chief of the weather bureau at Washington explains the origin of this wave.

It appears that with a high pressure system, rotating with great velocity, large volumes of cold air are drawn down from above the clouds, so that the cold wave is "homemade," being simply a product of motion. The system of motion originates in the northwest, but the cold air comes from above the clouds.

The cold wave is not only useful for its beneficial effect upon the human system, but as a cleansing and purifying agency. It dissipates the deadly carbonic acid gas, the product of respiration and combustion, and the foul effluvia of decaying matter, increasing atmospheric circulation generally and thereby relieving stagnation.—Medical Brief.

A Water Test.

It is one of the easiest things in the world to tell pure water from the impure. If you want to test the color of the water just fill a colorless glass bottle with the water and look through it at some black object, and the distinctness with which you can see the object will give you an idea as to the amount of clay or sand there is in the water. Then pour out one-half the water, cork the bottle tightly and set it in a warm place for about twenty-four hours. Remove the cork and smell the air in the bottle. If there is an offensive odor, even the slightest, the water is unfit for domestic uses. Well water, no matter how bright and sparkling, is as a times out of ten putrescent. Then, as a matter of course, decomposition is sure to set in in a day or two if you put the bottle in a warm place.

A Slip at Whistler.

A young San Franciscan, the owner of a large and valuable collection of autographs, once wrote to James MacNeill Whistler, politely requesting his signature. The letter was sent in care of the London Royal academy, with which the famous American painter was at outs. After four months the letter was returned to the San Francisco address from the dead letter office in Washington. Covering the envelope was the word, repeated numberless times, "Unknown."
