insuring a clean, pure article. Large stocks of Oak and Pine kindling woods (sawed to any length) is large and protected from the weather. Baled Hay, Lime in any quantity, Hair and Cement constantly in stock. Prices are right.

**FRANCE & DECORSE,**  
Successors to Dr. T. Twilley,  
Chestertown, Md.

GO to the business section of the town for all kinds of Hardware Repairs.

### THE ORIGIN OF COFFEE.

Why the Berry Defies Production in the United States.

As to the history of coffee, the legend runs that it was first found growing wild in Arabia. Hadji Omar, a dervish, discovered it in 1285, 617 years ago. He was dying of hunger in the wilderness, when, finding some small round berries, he tried to eat them, but they were bitter. He tried roasting them, and these he finally steeped in some water held in the hollow of his hand and found the decoction as refreshing as if he had partaken of solid food. He hurried back to Mocha, from which he had been banished, and, inviting the wise men to partake of his discovery, they were so well pleased with it that they made him a saint.

The story is told that coffee was introduced into the West Indies in 1723 by Chirac, a French physician, who gave a Norman gentleman of the name of De Cleux, a captain of infantry on his way to Martinique, a single plant. The sea voyage was a stormy one, the vessel was driven out of her course, and drinking water became so scarce that it was distributed in rations. De Cleux, with an affection for his coffee plant, divided his portion of water with it and succeeded in bringing it to Martinique, although weak, not in a hopeless condition. There he planted it in his garden, protected it with a fence of thorns and watched it daily until the end of the year, when he gathered two pounds of coffee, which he distributed among the inhabitants of the island to be planted by them. From Martinique coffee trees in turn were sent to Santo Domingo, Guadeloupe and other neighboring islands.

The coffee tree is an evergreen shrub, growing in its natural state, to a height of fourteen to eighteen feet. It is usually kept trimmed, however, for convenience in picking the berries, which grow along the branches close to the leaves and resemble in shape and color ordinary cherries. The tree cannot be grown above the frost line, neither can it be successfully grown in the tropics. The most successful climate for production is that found at an altitude of about 4,000 feet. Anything much above this is in danger of frost, which is fatal to the tree, and when coffee is grown much below this it requires artificial shade, which materially increases the cost of production and does not produce as marketable berries. It is owing to this particular requirement that coffee has never been successfully produced in the United States.—Success.

### MAKING BREAD.

Biscuit and rolls require a hotter oven than bread.

Bread should rise to twice its original quantity before it is ready to bake.

The sponge should be set at night if the baking is to be done in the morning; otherwise set it early in the morning.

Bread and biscuits should rise in a moderately warm place, for if too cold it will be heavy or if too hot it is likely to sour.

Milk is preferable for mixing. In some cases the quantity used will have to be varied a little, as some flour will absorb more moisture than others.

A good sponge can be made of one pint of sifted flour, one cake of compressed yeast dissolved in a cupful of warm water and liquid enough to make a batter. It should be left to rise till light.—Exchange.

### At the Theater.

One of the most annoying things in the world is to go to the theater and sit back of a man who has been to see the play and insists upon telling his companion all about the performance and what's coming next. The other night at one of the local playhouses a man was greatly annoyed by the occupant of the seat in front of him talking in a loud voice about what was going to happen on the stage. Finally, when the talk became incessant, he exclaimed:

"What an infernal nuisance!"

The man in front turned around and said in a threatening voice:

"Do you refer to me, sir?"

"No, indeed," replied the man in the row behind. "I was simply saying what I thought of the actors. They are making so much noise that I can't hear one-half of your interesting and valuable conversation."—Philadelphia Press.

### As She Understood It.

A pretty rosy cheeked country girl entered one of our large department stores. It was bargain day, and the crowd was greater than usual. She had wandered about from floor to floor, a little bewildered at the magnitude of the establishment, the largest she had ever seen.

Seeing her, a floorwalker approached and said, "Is anybody waiting on you?"

"Yes, sir," said the girl, blushing to the roots of her flaxen hair. "He's outside; he wouldn't come in."—Philadelphia Ledger.

### Conservatism.

"Wasn't the execution of the man who stole horses a trifle irregular?"

"It was jes' as reg'lar as we could make it," answered Bronco Bob stoutly.

"Course we didn't have no judge or jury handy. But we captured the feller on Wednesday an' put off the hangin' till Friday, so's to have it accordin' to custom."—Washington Star.

### The Bride's Critics.

"Now that we are married, dear," said the bridegroom, "you have a serious task before you."

"Why, George, what is it?"

"You must prove to my three sisters that you are worthy of me."—Philadelphia Press.

Some people make money by spending it.—Aitchison Globe.

### THERMOMETER DEGREES.

The Scale Invented by Newton and Amplified by Fahrenheit.

Why should the freezing point be marked 32 degrees and the boiling point 212 degrees on the Fahrenheit thermometer scale? Most students know that its inventor divided the space between these points into 180 degrees instead of the simpler 100 degrees used in the Centigrade system, but few understand how this number came to be chosen. A writer thus explains the matter:

The thermometer was really invented by Sir Isaac Newton. He started his scale with the heat of the human body and used as his instrument a glass tube filled with linseed oil. The lowest figure on the scale was the freezing point and the highest point boiling water. The starting point of this scale, as mentioned, was the heat of the human body, which he called by the round number 12, as the duodecimal system was then in common use. He divided the space between the freezing point and the temperature of the body into 12 points and stated that the boiling point of water would be about 30, as the temperature must be nearly three times that of the human body.

When Fahrenheit took up the subject a few years later he used the Newton instrument, but, finding the scale not fine enough, divided each degree into two parts and so made the measure between the freezing and boiling points 24 parts instead of 12. Fahrenheit then discovered that he could obtain a lower degree of cold than freezing, and, taking a mixture of ice and salt for a starting point, he counted 24 points up to body heat. By this measurement he obtained 8 for the freezing point and 53 for the boiling point. His scale now read: Zero, freezing, 8; body heat, 24, and boiling water, 53. It will be noticed that this scale is identically that of Newton's, only starting lower and having the numbers doubled.

It was with this scale that Fahrenheit worked for a long time, but finally, finding the temperature divisions still too large, he divided each degree into four parts. Multiplying the numbers just given by four the thermometer scale now in use results.

The chance choice of Newton of the figure 12 to represent the body heat determined the present thermometer scale, even as the yard, foot and inch measures originally came from measurements of parts of the human body, and as the width of a railroad carriage was determined by the width between the cart wheels necessary to bear a load which could comfortably be drawn by a mule.—American Inventor.

### What Fell Out.

"The next time my wife asks me to bring home a fashion paper," growled the baldheaded man, "I'll tie it up tight before I leave the office."

"I've been married twenty years, but everybody takes me for a bachelor. That's where the rub comes in about this fashion paper. My wife asked me to bring one home last night, and I bought the thing at a news stand on the L station. Of course I didn't look at it. When I reached my station I had to walk the whole length of the car to get out, and just before I reached the door a boy came after me, touched me on the arm and handed to me a big sheet of white paper all marked over with black lines.

"I beg your pardon," he said, "but you dropped this."

"Then everybody in the car laughed. The thing was labeled 'Mother's Friend,' and it was one of those paper patterns for things to go over corsets."—New York Press.

### Origin of the Hansom.

The hansom was the invention of Joseph Hansom, the architect of the Birmingham town hall. But the two wheeled cab which he patented in 1834 little resembles the vehicle which now bears his name. It had a square, sedan chair shaped body hung between two wheels nearly close feet high. The driver's seat was in front, as also was the door. The fare entered the cab between the wheel and shaft. The modern hansom was adapted from this original by Messrs. Gillet and Chapman. It is a peculiarly English vehicle, and no foreign nation has ever compassed the dogged courage of the Briton who can sit calmly inside it.—London Chronicle.

### Her Fear.

Maud—What makes you so awfully nervous, dear?

Clara—Why, Fred is to have an interview with papa this afternoon.

"Oh! And you are afraid your father will not give his consent?"

"No; I'm afraid Fred won't show up."

### A Mathematician.

"Father," said the little boy, "what is a mathematician?"

"A mathematician, my son, is a man who can calculate the distance between the most remote stars and who is liable to be flimflammed in changing a two dollar bill."—Washington Star.

### The Gallant Judge.

Magistrate—Next case! Who've we got now?

Constable—Joseph Biggins, alias "Skates."

Magistrate—Ladies first. We'll have Alice Skates take the stand.—Philadelphia Ledger.

### No Short Answers From Her.

"What was that Spillink said—that his wife had never given him a short answer?"

"Well, it amounted to that. She declines to use postal cards in writing to him."—Cincinnati Commercial Tribune.

How many friends have you to whom you can truthfully say, "You never offended me?"—Aitchison Globe.

## Bickford & Huffman Grain DRILLS.

POSITIVE  
FORCE FEED  
For Wheat and  
FERTILIZER.

PERFECT SPEED  
DEVICE.  
DOUBLE  
DISTRIBUTORS

"As ye Sow so shall ye Reap."

The most practical and modern drill on earth, with ribbon steel grain tubes, steel axes and roller bearings, the lightest draught and easiest running grain drill in use. In use everywhere.

### Rasin Monumental Co., FERTILIZERS!

Strictly High grade. These goods are largely in use in this county, and known to give the best results.

Leather Belting and Lace Leather.

OILS of all KINDS

### Oliver Chilled PLOWS.

Best on Earth. In use Everywhere.

Oliver Plow REPAIRS. We are the Oliver Company's agent, and are the only house in this town that sells the genuine Oliver Plows. Beware of bogus Oliver Plows. The town is full of them. Also repairs for South Bend, Advance, Syracuse and Ohio Plows.

The CHATANOOGA HANCOCK DISC PLOW the marvel of the age plows, and pulverizes hardest fallow ground without the least trouble, try it. It is just the thing.

### DISC HARROWS.

of most approved kinds to reduce your soil to a complete seed bed. Buffalo Pat's Land Rollers, complete implement. Rallow Harrows. A complete line of Farm Implements.

PUMPS F THE MOST IMPROVED PATTERNS.  
Owens' No. 20 IMPROVED FANS. The only Fan that will positively clean wheat of cockle and cheat.

### READY-MADE HARNESS.

and sold at smallest margins. I also make a specialty of \$10.00 Harness. Collars, Bridles, Hames, Traces, Strap Work and all furnishings used on the farm. Disc Harrows and Land Rollers.

Splendid stock of LAP DUSTERS, FLY NETS, HORSE GOODS.

A COMPLETE LINE OF BEST TIMOTHY SEED.  
**GEO. W. SMITH,**  
Elison Building, Chestertown, Maryland.

## FACTS!

### FIRST FACT.

Our Roasted Coffees excel all others for low prices and quality.

### SECOND FACT.

Our Teas are superior, in fact, have no competitor both for quality and price. Our trade extends to Galena.

### THIRD FACT.

There is no store that can show you the stock of Fine Shirts. Have the finest selection at the very lowest prices. A large stock just received at very low prices.

### FOURTH FACT.

Reader, especially ladies, if you want long life and comfort, you know we have one essential most prominent, that is the Finest Assortment of Tailor-Made Corsets in Kent county, every pair made to order and guaranteed or money refunded.

### FIFTH FACT.

The only place you can find the best selection of Dishes and finest assortment of Lamps is at our store.

### SIXTH FACT.

We sell the very best Tailor-Made WRAPPERS in Kent county. Our immense sales are proof positive.

### SEVENTH FACT.

Now, ladies—we mean you—the ones that pride themselves on Fine Pickling. Do you believe that you can buy the Vinegar we sell and guarantee to be strictly pure, absolutely pure Apple Vinegar elsewhere. From our many sales we think not.

### EIGHTH FACT.

Gentlemen, we are the originators of the Cigar named from our celebrated horse, Bedworth, Jr., and if, on trying one 25 cent's worth, you do not pronounce them the best smoke you ever had, we will gladly refund you your money.

### NINTH FACT.

Farmers, most of you know one great essential to a wheat crop depends largely on the kind of DRILL, and we think our Drill—the Buckeye—excels all others.

**WESTCOTT & DODD,**  
Aug. 1. Chestertown, Md.

## ROOFING MATERIALS

### LOOK AFTER YOUR ROOFS

winter is at hand.

I have just received a large consignment of Galvanized Corrugated Roofing, as also Rubberoid Roofing, Tarred Felt Roofing. I keep also Roof Coating of three different grades, as well as the great Leak Stopper Roof Cement.

## CARRARA

## Paints,

All Colors for All Purposes.

## Hay, Hay, Hay.

I have in transit a car of bright western Clover Hay.

All the above goods will be sold on close margin of profit for cash by

**Joseph Guest,**  
Chestertown, Md

## Every Trapper Needs The ONEIDA COMMUNITY JUMPTRAP

because it is made by the oldest Trappers in the world, and is thoroughly tested and guaranteed before leaving the factory. Your dealer will replace any that break.
