Kent News.

SATURDAY.....................MARCH 14, 1891

A CHURCH FESTIVAL.

BY MRS. A. G. LEWIS.

The first thing to be decided upon is the *kind* of festival or supper to have. There are so many different ways of serving "color teas" and "letter teas," that one is often puzzled which one to select, and how to serve the same by some novel method that will both attract and entertain guests.

It may be thought desirable to combine two ideas, for instance, an "orange" and an "O" tea, naming it, perhaps, an Orange festival, the O being printed after little Joe's direction, "uncommon large." In that case if there be a long list to select from, the committee may well be chosen from the O's thus: Mr. and Mrs. Oldham, Mr. and Miss Osier, and so on. If the list is limited other names may be capitalized, thus: Mr. and Mrs. HOOD, Mr. and Mrs. BrOwn, Miss BOOth and Mr. BOnd.

In order to make sure of the number and a *large* number of guests (an assurance that must never be lacking,) and that the tables be supplied amply with suitable food, it is necessary that the parish list be divided into smaller lists by which the committee may make sure that every family is called upon. The number of tickets promised, and the quantity and kind of contributions for the table, may then be reported to the chairman.

The above details are indispensable to the success of church or charity festivals where the object is to raise a goodly sum of money.

DECORATIONS.

The tables should be covered with orange-colored cheese-cloth, or mosquito netting over white cloth. Either may be bought by the piece for four or five cents per yard, or, plain white tablecloths, decorated with orange-colored tissue paper, may be used. The cost of the American manufacture is ten cents per quire. The English make is nicer and costs thirty-five cents per quire. Four quires will decorate and furnish napkins for two hundred guests. It may be ordered of most any stationer.

A pretty plan for decorating with tissue paper is as follows:

Cut the paper in strips three inches wide. Slash these in form of fringe, making the slashes a third of an inch wide, at least. The fringe is then easily crimped by using a knife or scissors to crowd the slashes between the thumb and first finger, pinching them well, so as to form firm creases. Several thicknesses of the paper may be cut and crimped at once. Pin these fringed strips upon the cloth at the edge of the table (not for a border to the tablecloth,) putting on one or more rows as desired. Table napkins, nine inches square, fringed and crimped may be made out of the tissue paper.

Tasteful mats are made by folding sheets or colored paper, first double, then in squares, then in triangular form. Cut the edge of the folded paper in diamond-shaped holes of different sizes. When unfolded and laid above the white cloth these mats are very ornamental.

Platter mats, also, are made by pasting orange-colored paper upon cardboard cut in proper form. Then fasten a full fringe of crimped paper about the edge, which must appear outside the rim of the platters.

Handsome centre-pieces can be easily arranged by lining with paper fringed to come beyond the edge, glass dishes that stand high, so graded that the largest size is at the bottom, the smallest at top, these may be decorated with fruit or flowers, or both. Colored dishes and glasses, also orange frosting and garnishing—by using the yolks of eggs only for icings and salads, and orange peel, cut in odd shapes, for meats—ensure very novel and pleasing effects.

ROOM DECORATIONS.

Draperies for windows; festoons or orange-colored paper or cloth, baskets of flowers, hoops covered with orange paper flowers, butterflies, Japanesque form of decoration, all may be utilized in various ways to beautify the room, the orange color, of course, predominating.

MENU.

The bill of fare may be limited to such articles of food as begin with the letter O. A few suggestions may be helpful:

Old Government Java (coffee.)
Old Hyson (tea.)
Oleomargarine, (butter.)
Orangated Porko, (ham.)
Old Boston Comforts, (baked beans.)
Our Staff, (bread.)
Orangeade.
Orange a la Salade.
Oysters, etc., etc.

In case a large range is required, the food may be named thus:

TOngue, FOwl, COnfections, etc., etc.

COSTUMES.

Peasant costumes for young ladies are decidedly pretty and well suited for those serving at the tables:

Blouse waists; velvet bodices; full, bright-colored skirts; stockings to match skirt; low shoes and fanciful white caps trimmed with orange ribbons.

The Spanish costume is preferred for young men: velvet coat; knee trousers; black stockings; low-cut shoes; broad sombrero; sash of orange-colored silk, or the simpler form of wearing necktie and handkerchiefs in the desired color will do.

ENTERTAINMENT.

It is impossible to do more than suggest novel features for entertainment. Their elaboration must rest with the committee in charge.

Choruses of orange girls, guitar and tambourine players and jinglers of fairy bells, (such as are used for trimming reins for boys' harnesses;) boys playing bones and light-weight drums, may accompany the piano. This combination gives very pleasing and effective music, well suited for an occasion of this kind. The *tempo* of the music should be in 4-4 time. *"O, what a chorus!"* may be arranged thus: Young men in Spanish or ordinary costume may be selected. From quite stiff pasteboard cut the letter O, just large enough to surround their faces and about three or four inches wide; cover this with orange-colored paper. Pendant from the sleeves and skirts of their coats, also a string of the same for a necklace, oranges may be arranged. A curtain at the rear of the platform should conceal them. When it is withdrawn, they move with the appearance of automatic action to the front of the platform, their faces set squarely towards the audience, and their bodies held with the rigidity of soldiers on drill. Various suitable musical selections well committed to memory, nursery rhymes, medleys, familiar poems, "Mary's Lamb," etc., etc., may be rendered, the performers employing simultaneously the same gestures and attitudes. When retiring after each member, they step backward with soldierly precision and wait for the curtain to conceal them from the audience.

The above suggestions may be carried out in connection with a musical and literary programme. The same ideas may be carried out in lawn parties where tables are to be set out-of-doors. The lawn may be decorated with orange bunting, and pretty mottoes in yellow lettering may be arranged upon the grounds.

AN EGG FACTORY!

Eggs Will Soon be Manufactured by the Millions—Shell, White and Yolk.

From the Phila. Times.

Eggs by the carload for 3 cents a dozen! That is the way it is proposed to turn them out in this city presently. Patents have been granted to James Storrey, of Kansas City, for the manufacture of eggs, and he is said to be thinking of locating his factory in Philadelphia. All the neccessary machinery, which is not worth more than $500 at the outside, is in readiness to begin this overwhelming competition with the American hen. If as much success attends the new venture as is anticipated by Mr. Storrey, the contest between the machine and the hen for supremacy in the egg-producing business will be short, with the victory to the credit of the former.

Mr. Storrey's process is very simple, and yet he is prepared to manufacture an artificial egg that a connoisseur will find it difficult to distinguish either in appearance or taste from the prime product of a Plymouth Rock or a Leghorn.

GOOD SUBSTITUTE FOR THE WHITE.

The "white" of the egg is about one-eighth pure albumen, and is a difficult substance to produce chemically. A substance that appears to the eye exactly similar, and which hardens and whitens when cooked, has been produced by a mixture of legumin, of vegetable albumen, extracted from common peas, and which forms just one-fourth of the peas, a little albumen from beef blood, a trifle of sulphur, considerable gelatin and a chemical solution to prevent rapid decomposition, and which also whitens the whole bulk when subjected to heat, just as the egg becomes white when boiled.

As beef blood will be utilized in very large quantities in the big egg-mill, a few special cars will be fitted up with tanks to bring the blood here from the Chicago slaughter-houses, provided that not a sufficient quantity of the blood can be gotten in this city.

MOLDED TO A NICETY.

The shell will be perfectly imitated by a simple solution of lime, water and glue. The machinery that is required is needed mainly in putting the egg together. Every yelk will be first run into a mold to be shaped, and then dumped into a second mold, where the right quantity of the white is placed previously. This latter substance, being a gelatine-like matter, will incase the yelk readily. By a unique machine the meat is there enveloped in the shell.

The shell is only partially hardened when the egg is put into it, and as there is a liberal amount of glue added to the lime, the edges of the shell soon adhere to each other very tightly, leaving no traceable mark where they were joined. In order to make the imitation more completely successful, molds of several sizes will be introduced, making the eggs vary in bulk as do the products of any respectable flock of hens. The color of the shell will also be of two or three shades, rendering the likeness to the original still more striking.

Test have been made which show that the artificial egg can be preserved for a month under proper conditions and still taste as fresh as one just laid by an ordinary hen. As all the ingredients of this reform egg are exceedingly cheap, it can be manufactured at the rate of about 3 cents a dozen. There will be no limit to the capacity of the novel mill, and families and boarding-house-keepers can be supplied in any quantities at prices so dazzling small as to warrant immediate popularity.

HINTS FOR SHEEP-RAISERS.

In treating foot rot remember that every particle of virus must be removed or killed, or the flock is in danger.

Naturally, as wealth increases, the demand for finer grades of wool will increase. There is no profit in growing poor wool, anyhow.

Be careful not to feed too many roots to the breeding ewe. Roots are largely composed of water, and too much cold water all understand is injurious to the ewe.

It is of the utmost importance that the breed of sheep selected shall be fitted to the conditions under which they are to be kept, else the wool will necessarily be affected.

Wool must be equally strong the entire length of the fiber, or necessarily it will be of less value to the manufacturer; and wool of that kind can not be grown unless the sheep is kept in good condition all the time.

Sheep breeding and wool growing must excite the enthusiasm of the flock-master, if the business achieves the highest success. The man who is careless with his sheep—pays little attention to them—will never get rich at the business.

Costiveness in sheep is very apt to occur in winter when no roots or ensilage are fed. In such a case the value of oil meal can scarcely be over-estimated. If the flock-master has no green food we believe it will pay him to buy some oil meal at any cost that anybody will likely have to pay.

Volumes have been written against the dog, but it must be concluded that the dog is here to stay. Then raise the dog tax and pay for the loss of sheep killed by dogs. It is nobody's business, we suppose, if the community chooses to feed dogs on mutton if the community is willing to pay for it. The trouble has been that it has not been willing to do that.

JENKS' DREAM.

Jenks had a queer dream the other night. He thought he saw a prize-fighters' ring, and in the middle of it stood a doughty little champion who met and deliberately knocked over, one by one, a score or more of big, burly-looking fellows, as they advanced to the attack. Giants as they were in size, the valiant pigmy proved more than a match for them. It was all so funny that Jenks woke up laughing. He accounts for the dream by the fact that he had just come to the conclusion, after trying nearly every big, drastic pill on the market, that Pierce's Pleasant Purgative Pellets, or tiny Sugar-coated Granules, easily "knock out" and beat all the big pills hollow! They are the original and only genuine Little Liver Pills.

Beware of Imitations, which contain Poisonous Minerals. Always ask for Dr. Pierce's Pellets, which are Little Sugar-coated Pills, or Anti-bilious Granules. **One a Dose.**

SICK HEADACHE,

Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all derangements of the stomach and bowels, are promptly relieved and permanently cured by the use of Dr. Pierce's Pleasant Purgative Pellets. They are gently laxative, or strongly cathartic, according to size of dose. Smallest, Cheapest, Easiest to take. 25 cents a vial, by druggists.

Copyright, 1888, by WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, 663 Main St., Buffalo, N. Y.

School-Houses and Pure Water.

Dr. C. W. Chancellor, secretary of the State Board of Health, in delivering a lecture recently, among other things said:

"We must also have school-houses where children can be educated without losing their health because of sanitary defects, which render the school-room but little better than a fever ward in a hospital, and make a school session as fatal as a campaign against the Indians. The first piece of knowledge that our authorities should try to grasp is the fact that a child can no more live and thrive in the impure atmosphere of a crowded, ill-ventilated school-room, than a mountain trout can exist in a stagnant pool of filthy water. Among the many imperfections of construction, etc., connected with our public school buildings, the outside "offices" are often abnormally filthy, and shocking to every sense of decency. The absolute necessity of an abundant supply of pure water in the maintainance of health is now universally admitted; but the importance of the subject is seldom realized by municipal authorities, and the manner in wnich typhoid fever, diarrhœa, cholera and other zymotic dieserses are transmitted by means of polluted water is little understood by the masses."

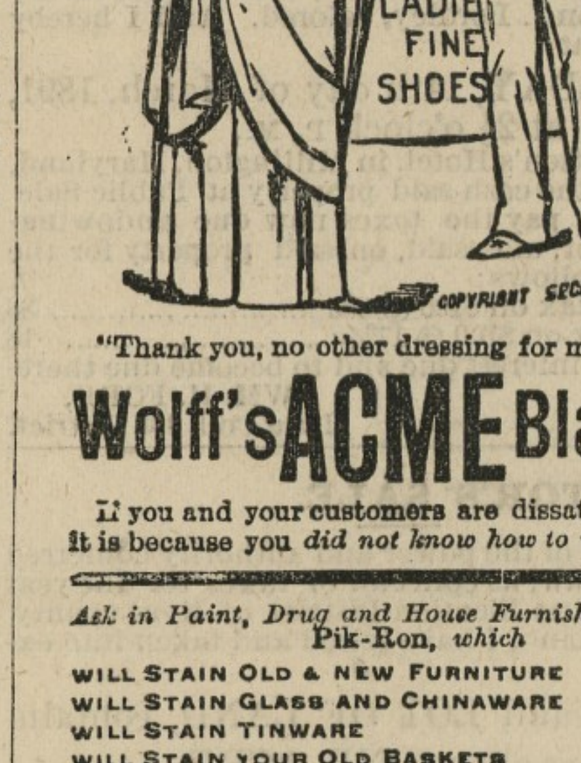

VALUABLE TREE WASH.

A Mixture That Will Keep the Orchard Clean of Bugs and Worms.

A bout two years ago I cut a recipe for a tree wash from your valuable paper, and it has kept my trees clean of bugs and worms; in fact, I could not do without it, as the borers do not trouble the trees, and I think you ought to publish it again for the benefit of those of your readers who have not tried it. I copy it verbatim:

"Take stone lime, slack and prepare it as for an ordinary whitewash, in an old barrel or box. Take enough at a time to make a bucket two-thirds full of the proper consistency for ordinary whitewashing. Now add one pint of gass tar, one pound of whale-oil soap dissolved in hot water, or one pound of potash, or strong lye from wood ashes, then add clay or loam enough to make the bucket full of the wash of proper thickness ot be applied with a white-wash brush. If the trees have had the earth ridged up around them, take the earth away from around the collar and apply the wash to the body of the trees from the limbs to the ground or down to the roots.

OATS is one of the earliest crops to be sown in the spring, and it is quite an item to have every thing in readiness so that as soon as the condition of the soil will admit the seeding can be done. Where a regular system of rotation is carried on, oats should follow corn. While in some respects they may not be so profitable as corn, yet, if properly managed, they make good feed for stock, furnish both grain and roughness and add to the variety.

"Thank you, no other dressing for me but

Wolff's ACME Blacking

For BOYS' & YOUTH'S.
$2 & $1.75 SCHOOL SHOES.

W. L. Douglas Shoes for Gentlemen are made in Congress, Button and Lace, sized 5 to 11, including half sizes and widths, and all styles of toe. Boys' sizes 1 to 5 1-2, and youth's 11 to 13 1-2, also half sizes in each.

W. L. Douglas $3.00, $2.50 and $2.00 Shoes for Ladies are made in "Opera" and "American Common Sense." Sizes 1 to 7, and half sizes: C (except in $2.50 shoe), D, E, EE widths.

W. L. Douglas $1.75 Shoe for Misses, 11 to 2 and half sizes, regular and spring heels.

CAUTION! BEWARE OF FRAUD. Do you want to wear the genuine W. L. DOUGLAS SHOES? If so, read this caution carefully. W. L. Douglas' name and the price are stamped plainly on the bottom of all his advertised shoes before leaving the factory, which protects the wearer against high prices and inferior goods. If a shoe dealer attempts to sell you shoes without W. L. Douglas' name and the price stamped on the bottom, and claims they are his make, do not be deceived thereby, although the dealer may be your personal friend, put him down as a fraud.

It is a duty you owe to yourself and your family during these hard times, to get the most value for your money. You can economize in your foot-wear if you purchase W. L. Douglas Shoes, which, without question, represent a greater value for the money than any other make in the world, as thousands who have worn them will testify.

Wanted—A local agent in every city and town in the U. S. not already occupied. Correspondence invited.

If local advertised agent cannot supply you, take no others, but send direct to factory, enclosing advertised price. **To Order by Mail,** Gentlemen and Boys will state size usually worn, style and width desired. Ladies will please state style desired, size and width usually worn, and if a snug or loose fit is preferred. Misses size and kind of heel.

THOMPSON---Up Town.

"Hello, Where's Bill Thompson?"

WHY, I'VE MOVED

INTO my NEW STORE, directly opposite to where I have been for the last eleven years, and would be pleased to have you all come and see me. I shall try to keep as usual a full stock of

Groceries, Provisions, Boots and Shoes,
Hats and Caps, Domestic Dry Goods,
Tinware, Queensware, Hardware, &c.

all of which will be sold at close bargains. We make a specialty of

BOOTS and SHOES

and would mention a few of our leaders: 1st. That Lady's Kid Front, Glove Kid Top, Worked Button-hole Shoe, at $1.75, have sold 1,400 pair of them in a little over three years, and every lady that buys one pair of them wants them again. 2d, A Man's Solid (guaranteed) Plow Shoe at $1.00, same as is sold elsewhere for $1.25. 3d, A Lady's Good Lace or Button-ed Shoe for $1.00. 4th, Our Double Upper, 22-Inch Leg Oyster Boot at $2.75 a pair.

Lime, Hair and Whitewash Brushes.

We are selling the W. J. Lime, which is said by both masons and carpenters to slake at least one-fourth more than other limes.

FLOUR! FLOUR! FLOUR!

We have also Lea's and Gambrill's brands of Flour by the pound, bag and barrel, but please bear in mind that we sell Flour by the Barrel for cash only.

Our aim is to keep a little of everything and while we do not expect or wish to sell all the goods that is sold in Chestertown we would like to sell a small share of them. Thanking on all for past favors and patronage we only ask a continuance of the same.
