The New Deere No. 9 Planter

This is the corn planter which has demonstrated to thousands of farmers that it is practicable to obtain a perfect stand of growing corn. Our unrivaled edge selection drop, used only on Deere Planters, has become immensely popular. More corn per acre can be grown when the New Deere Planter is used, because it puts the required number of kernels in every hill. And a full stand is the first and most important step in securing the maximum yield of corn. If you are interested, write for our book containing full particulars. It contains information which will enable you to improve the quality and increase your yield of corn. Our handsome and useful pocket companion free.

Johnston FARM TOOLS

NOT IN THE TRUST

When you put your money into a Johnston farm implement you can rest assured you will get the very best value you ever obtained in farm machinery. The reason why they stand so high with the thousands of farmers in this and foreign countries is because they give that real, genuine satisfaction in the field which every buyer of farm tools hopes to get. They fulfill the highest expectations; are so positively dependable, so thoroughly practical and do the work so much better, quicker and easier than when compared by actual service with others, their superiority is at once apparent.

Here we show some of them. We cannot tell you all their special strong features here; their exclusive advantages—illustrations just why they do their work better, quicker and easier, just why they last longer, why the breakage is so rare, why they are the cheapest, but our 1908 Catalog will give full description of our full line. You should not buy a single tool until you read it. It will help you to avoid making a mistake and post you as latest improvements. A postal brings it. Write today.
