# How is Your Eyesight?

THIS IS AN AGE OF SPECIALTIES.

The eye is too delicate an organ of our body to trust to any one who is not a specialist of eye sight. Your family physician, who is an honest and conscientious man, but who has not specialized on the eye, will not undertake to examine your eyes and prescribe glasses, not because he thinks it a minor detail, but because he knows what the eye is.

This same physician who has spent years in college and knows the anatomy of the eye thoroughly does not undertake to prescribe glasses, but refers you to a specialist, while we have hundreds of jewelers who have never seen the inside of any medical or optometrical school, who will not hesitate to sell you a pair of "Spectacles" regardless of the physiological condition of the eyes. If you suffer with headaches or nervousness do not hesitate to see

My prices are resonable and I will not tell you to get glasses when I find you can not be benefitted by them. I have opened an office in Chestertown, in the Shaw Building, next door to Mr. Hope H. Barroll's law office, where I will await your patronage. Phone or see me personally and I will call at your house if desired.

Respectfully
