Our farmers have stopped roller skating and are plowing fallow and cutting off corn, and while the corn crop will be small, some of the farmers find their corn better than they expected. The tomato crop is good with most of them, and while Cook and Peary are proving who found the North Pole, the farmers are rushing their fall work with all the force they can get. Surely, they want to get through with their busy work and then they can meditate over the many new things of the year. We will only mention a few. The drought of 1909, the dispute about finding the North Pole. We are sorry that one or both of these fellows belong to the Ananias Club. We have a new President, we have a new tariff revised upward. The President might have let me had his Auto. to play with while he goes on his little trip of 13,000 miles, being he can't come to Kent county anyhow. We must not forget the Exposition at Seattle, as we understand it will be a success, financially as well as otherwise, which we believe is something new in the exposition line; and last but not least of the year's new things will be the number of acres our farmers will drill in on day. There is often a silent contest going on between them, and it is astonishing what a farmer can do when he overleaps himself and gets in a hurry.

Rev. Mr. Reynolds has been sowing the seed since last conference in our community, and his congregations are growing, and may the time be near when there will be a bountiful harvest with many laborers.

Wm. F. Garey has moved to the Dr. Urie farm, and Charlie Smith moved from the Urie farm to the house made vacant by Wm. F. Garey.

Mr. D. T. Nickerson has been somewhat indisposed the past few days, but he still keeps going, and is ready for business.

Morgan Bennett has returned from a Wilmington hospital, where he has been the past three weeks, very much improved in health.
