CONTROL THE EMOTIONS.

One of the Essential Conditions of Nervous Balance. Now, then, can the nervous sufferer help himself? To begin with, he should ask himself: "What is there in my physical life which may account for my nervousness? Is my diet sufficient in quantity and nutritious in quality? Do I get enough sleep? Is my work congenial? Is my environment in any degree suited to my tastes and aptitude?" These are simple questions, and yet their answer often depends on the possibility of nervous health or nervous disease. If the sufferer discovers that any of the physical causes of a nervous breakdown are in operation it is obvious that it is his first duty to fight against these causes, to lessen them and if possible to remove them altogether. In the next place—and this is especially to be noted by nervous women—one of the essential conditions of nervous balance is the control of the emotions. The tendency on the slightest provocation to give way to a paroxysm of tears is dangerous, because it leads to weakness, bodily and mental. No doubt there are moments of poignant agony when tears are nature's beneficial provision for some relief to an overstrained nervous and mental organism, but these moments come at rare intervals in our lives, and, as a rule, so far from weakening our mental or moral life, they uplift and purify it. What nervous people must be warned against is the tendency to let themselves go because of some petty worry or some slight domestic difference or through some morbid impulse to self pity.—Rev. S. S. McComb in Harper's Bazar.

DUTCH SPORTS.

Holland the Land of Sledding, Sledging and Skating. Probably no other boys and girls had better times than the Dutch boys and girls in old and new Netherland. Holland says W. E. Griffin in his book "The Story of New Netherland," is the land of skates and sleighs. Children and young people hardly learn to skate; they begin it naturally and keep it up all their lives. Whether for fun or in parties or to go to the market, to church, to weddings or funerals, they move by rapid transit on steel. A pair of skates is a passport to comradship. Every habit and each trick known on Holland canals or ponds was reproduced on the Mohawk and Hudson. There was the iceboat or sailboat on runners, sometimes reduced to swiftness to a long plank with crosspieces for seats and with skate irons. Equipped with mast, canvas and some courage, it seemed to race with the wind itself. As for coasting, wherever flat Holland could show a hill or slope or Friesland furnished a torp or artificial mound there were the boys and girls at fun. On the ice lady or lass sat in a hand sleigh, while husband or swain pushed as he skated. All this shows the reason why Newburgh-on-the-Hudson and Albany and the hills of Dorp are so famous for coasting and the North river for ice yachts and why from the first generation of settlers the Dutch-American towns were noted for sledding, sleighing and skating.

A Fishing Story. Angling has some very marvelous "incidents" among its many records. Hampshire has its true tale of a duck which became entangled in a trout line and, breaking off the gut, trailed the fly behind her and actually hooked a fair sized fish. The struggle between the two must have been as extraordinary as that of the Dumfries gander which became similarly attached to a line and hook baited with dead frog. In this case a voracious pike was hooked, and a veritable tug of war ensued, in which the astonished bird performed sundry somersaults on the surface of the water until victory at last rewarded the feathered angler, which towed to shore one of the largest fish ever caught in that particular loch. And that the tale is true makes it all the more interesting.—London Black and White.

WESTON, Ocean-to-Ocean Walker. Said recently: "When you feel down and out, feel there is no use living, just take your bed thoughts with you and walk them off. Before you have walked a mile think you will never 'last try it.' Have you noticed the increase in walking of late in every community? Many attribute it to the comforts which Allan's Foot-Ease, the anti-sprinkle powder to be shaken in the shoes, gives to the millions now using it. As Weston has said, 'It has real merit.'"
