FAIRLEE ITEMS.

So many people are coughing around, indicating that colds are prevalent. Some are remaining indoors and petting the malady as nicely as in their power lies. Others are up-to-date and are taking in the open air along with other helpful medicine. Pneumonia, even with infants, is being treated by our physicians of the present day, right out in the open air. Physicians have always held that good air is healthy and bad air unwholesome. The air in the rooms of our dwellings which has for years been supposed to be sufficiently pure, is now known to be nothing more than a sort of lung cess-pool, even with fairly good ventilation; so if a healthy man requires a certain amount of pure air, how much more needful must this pure lung food be to those with crippled respiratory organs. There is no disease of the system which is not in some degree benefitted by fresh air, from typhoid fever to the worst form of pulmonary troubles.

There is much speculation here as to who will be our next magistrate, a new one is conceded a necessity, may the best man be selected, and who is a better man than Mr. Joseph C. Kendall? Royal Baking Powder

Absolutely Pure

Made from Pure Grape Cream of Tartar

In baking powder Royal is the standard, the powder of highest reputation; found by the United States Government tests of greatest strength and purity.

It renders the food more healthful and palatable and is most economical in practical use.

Housekeepers are sometimes importuned to buy alum powders because they are "cheap." Yet some of the cheapest made powders are sold to consumers at the highest price.

Housekeepers should stop and think. Is it not better to buy the Royal and take no chances—the powder whose goodness and honesty are never questioned?

Is it economy to spoil your digestion by an alum-phosphate or other adultered powder to save a few pennies?
