AMERICAN WOMEN FIND RELIEF

The Case of Miss Irene Crosby Is One of Thousands of Cures made by Lydia E. Pinkham's Vegetable Compound.

How many women realize that it is not the plan of nature that women should suffer so severely.

Thousands of American women, however, have found relief from all monthly suffering by taking Lydia E. Pinkham's Vegetable Compound, as it is the most thorough female regulator known to medical science. It cures the condition which causes so much discomfort and robs these periods of their terrors.

Miss Irene Crosby, of 313 Charlton Street, East Savannah, Ga., writes:

"Lydia E. Pinkham's Vegetable Compound is a true friend to woman. It has been of great benefit to me, curing me of irregular and painful periods when everything else had failed, and I gladly recommend it to other suffering women."

Women who are troubled with painful or irregular periods, backache, bloating (or flatulence), displacement of organs, inflammation or ulceration, that "bearing-down" feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, Lynn, Mass., for further free advice. She is daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising women free of charge Thousands have been cured by so doing.

HORTICULTURAL.

Maryland has an able Horticulturist, nothing with which to work. The fruit and truck industry amounts to fifteen million dollars annually.

But few people of the state know we have a thorough trained Horticulturist, raised in one of the Apple Orchards of Canada, one who never tires. In professor W. W. Hutt, the state of Maryland has a man every fruit grower, trucker, gardner and florist admires. We can represent our state creditably before any state or Society.

For example, experiments are being conducted at College Park to obtain better varieties and methods of cultivation, they are doing the best they can with the unsuitable soil, but these experiments should be conducted at several points in the state and under the most favorable conditions of strawberry growing. We must maintain our competition with the South.

Success of orcharding on the Eastern Shore as shown by the apple exhibit of a few men at the Peninsula Horticultural Society, our state Horticulturist should be able to experiment and to develop this industry on the Shore, and also the mountain regions of the State.

We have thousands of acres of land in the state that could produce just as good fruit as was shown at the State horticultural Society in Baltimore, and at the Peninsula Horicultural Society at Chestertown, Md., if experiments were conducted to show the people our possibilities.

Immigration is coming into our State from the West. We should show by Horticultural Experiments what can be done on our Maryland Lands.

A great deal is talked about our mineral products which aggregate about $8,500 per year, and our Fish and Oysters which are worth ten millions, but our fruit and trucks alone are worth fifteen million annually. Does not our interest of this nature deserve the consideration of our Legislature?

The present Act provided eight thousand dollars for the conserving our Horticultural interest at the hands of the state Entomologist, and Pathologist, but not a dollar is provided to the State Horticulturist for experimenting and developing the Horticultual interests of the State.

We stand first in the canning of tomatoes in the United States and fourth in the packing of corn and neighboring states are crowding hard to capture our trade in this line, and we are doing nothing to solve the canners problem or to foster his large interests in this state. We have on our Eastern Shore as good land for Sweet Potatoes, as has Virgina and New Jersey and yet we do little or nothing to encourage this intersst.

It might surprise many of our Maryland People to know that in this great truck and vegetable producing state our markets are supplied in the winter with the best tomatoes, cucumbers and greenhouse products shipped in from the State of Massachusetts. Massachusetts expended last year sixty thousand dollars for Horticultural interests in that state. In Maryland our Horticulturist at the Experiment Station in trying to work out these problems in Green-House work with an equipment that is wholly inadequate.

Work already inaugurated and in progress by the State Horticulturist. A series of Experiments in Pear Breeding to cross our hardy, heavy bearing Kieffer with varieties of high quality and thus secure a better market pear.

Second: The testing of varieties of Grapes and methods of training and spraying to resist the destructive rot that has so discouraged our growers.

The study of market conditions in reference to Maryland fruit and truck, the kind of carriers and the methods of packing best suited to the market. The testing of the texture of fruit in reference to its carrying and keeping qualities.

The testing of culture and fertilizers on the production of Asparagus and methods of combating the rust and insects.

The effect of frost on Peach trees. The growing of Carnations, Chrysanthemums and Green-House lettuce commercially to ascertain what money crop can give the greatest return for every square foot of green-house. Variety and cultural tests with sixty-eight varieties of Strawberries.

A sample of the apples grown on the Mountains of Maryland was the Grimes Golden, sampled by the members of the Legislature some weeks ago, every one spoke in the highest terms of the Grimes. Other winter varieties like York Imperial, Winesap, Stayman's Winesap are grown to perfection.

Go in the mountains of Western Maryland and see the men that are willing to plant thair lands to fruits and vegetables, but for the lack of some Horticulture training in many instances, thousands of acres of the best apple lands of the United States are laying idle, not paying anything, that can be made valuable and will pay the State a handsome revenue in taxes in a few years. Land that can be bought for five dollars per acre can be made worth one hundred to five hundred dollars per acre in ten years, in fruit. We have the soil, climate, labor, near the best markets of the United States and near the exporting points for Europe. Why not avail ourselves of the opportunity?

Yours for fruit,
ORLANDOR HARRISON,
Berlin, Maryland

TO BE HANGED IN COURTROOM.

Murderer Will Die on Scaffold Over The Judge's Stand.

[Special Dispatch to the Baltimore Sun.]

Evansville, Ind., March 4.—Garth Tompkins, a murderer, will be hanged in the Circuit Court room at Madisonville, Ky., upon order of Circuit Judge Fleming M. Gordon.

The date is fixed for March 15 and it had been arranged to hang him on a vacant lot near the courthouse, but the people of the town protested, saying it would bring disgrace to the town. Judge Gordon was appealed to and decided to have the execution take place on the inside of the courtroom. The scaffold will be built over the judge's stand.

This probably will be the first case on record where a legal execution has taken place on the inside of a courtroom. Tompkins killed a man you married his former wife.

PROGRESSIVE EUCHRE INDICTED.

Kentucky Grand Jury Says It Differs From Gampling In Degree.

Cynthiania, Ky., March 4.—"The pink tea where society plays progressive euchre and gives prizes to the winners has the same degrading influence as the gambling house where roulette and poker are the attractions, the difference being only one of degree." This is the report made by the grand jury to judge of the Hardison Circuit Court. It matters very little, say the jurymen, whether the prize for winning be a silver dollar or a silver thimble.

After expressing this opinion the inquisitors informally demanded that investigation be made of the progressive euchre parties and all offenders be indicted under the anti-gambling laws. The report says, in part:

"Progressive euchre parties are made alluring with prizes, refreshments and the knowledge that the local papers will print the names of the guests and the winners of prizes. All are common gamblers and deserve to be fined."

A TRAMPS OWN RITUAL.

Question—Who comes here?

Answer—A poor worthless candidate for charity, who begs to have and receive part of the free lunch of this town set apart for regular customers as many thousand tramps have done before me.

Q—How do you expect to gain the rights and privileges?

A—By being a man too lazy to work, not ashamed to beg, and under the tongue of generally bad report.

Q—Where can this report be had of you?

A—In the police reports and the inebriate asylum and at the Cafes.

Q—From whence came you?

A—From a town in Texas called Booze.

Q—Then you are a regular tramp I perceive?

A—I am so taken and arrested wherever I go.

Q—How do you know you are a regular tramp?

A—By being often arrested and tried and never acquitted, and expect to be arrested, tried and convicted again.

Q—Where were you first prepared to be a tramp?

A—In a small bar room adjoining my place of abode.

Q—How were you then prepared?

A—By being kicked and cuffed around until divested of nearly all of my clothes, having been previously deprived of all my money and diamonds.

Q—What first induced you to become a tramp?

A—That I might travel all over the land and indulge my ravenous appetite for beer and sponge my living from an easily humbugged public.

Q—How am I to know you to be a tramp?

A—By the size and laziness of my feet. By the size and color of my nose and by signs, grips and words.

Q—What are words?

A—Certain plausible tales that will best serve to induce the lady of the house to give up her cakes and pies.

Q—What are signs?

A—Dirty face and hands, torn and dirty clothes, with a bad limp in either leg.

Q—What is a grip?

A—A tight hold of anything portable that can be turned into ready cash.

Q—Will you give me a grip.

A—No: get on some other fellow.

Q—How did you first gain admission to this town?

A—By a long tramp at "low Twelve" the time when all policemen are called from labor to refreshments.

Q—How were you received?

A—By a cop just on the point of taking a Manhattan eye opener.

Q—What did he do with you?

A—He put me in a collar in due form.

Q—What was next done with you?

A—He conducted me around from east to west to the court house and told me to stand erect and face the public judge.

Q—What did the judge say to you?

A—He told me to say my name, promise to obey the law, after which he ordered me to take a step to the left and follow the cop to the place from whence I came.

In loving remembrance of our darling Helen Joseph the infant daughter of Fannie and Joseph Dixon. She departed from this world Wednesday night about nine o'clock Feb. 14, 1906, of a severe case of gastritis bronchitis and was buried Friday Feb. 16, age 1 year, 8 months and 27 days. Interment n Galena Cemetery.

FOR EARLY APPLICATION THIS SPRING

TRADE MARK

WE OFFER OUR ASPARAGUS FERTILIZER
WE OFFER OUR OAT FERTILIZER.
WE OFFER OUR GRASS FERTILIZER.
WE OFFER OUR POTATO FERTILIZER.
WE OFFER OUR CORN FERTILIZER.
WE OFFER OUR PEACH TREE GUANO FRUIT GROWER.
These are all right.

BUT TOMATOES!

WHY IS IT Peerless outsells all other Tomato goods?
WHY IS IT Peerless sells higher than other brands?
WHY IS IT other fertilizer men say their Tomato Fertilizer is as good as Peerless?
The answer is easy—everybody knows it.

QUALITY

Captain Emory grew on one occasion 17 tons per acre. Mr. Zac T. Gilbert grew 19 tons to the acre. Mr. G. W. Collins has bought as high as 50 tons per year, and his men grew from 12 to 15 tons per acre. We have sold already in Anne Arundel county, the lower counties and New Jersey, hundreds of tons already. Messrs Baker and Morgan have bought as high as twelve hundred dollars worth; Messrs. Smith, Rouse & Webster have bought in the past as much as several thousand. Captain Dashiel says he would have it if he had to give $50.00 per ton for same. Mr. Joseph Downey says when he was canning that he could actually tell the difference in tomatoes grown with Peerless when brought to his cannery. Mr. Numsen says he knows that tomatoes grown with our goods are fine. Mr. Frank Moore who runs Assaw Bains & Co.'s cannery, says the best tomatoes brought there are from Peerless. Mr. Loose, a customer of his, says a ton of Peerless grew him $96 00 worth more tomatoes than another goods costing $7.00 less per ton. Mr. Money says it is certainly good. We could go on, but with a testimonial will close.

Unsolicited, some time ago Mr. W. S. Elburn & Son came into our office and said: "I believe your Peerless to be the best tomato goods I ever saw. You remember what an advocate I was of it when I lived out at the mill. Well, wherever I have lived since, on the Western Shore or elsewhere, I would have it, and last year I put some of this same goods on some onions grown from the seed, and they were as fine as Bermudas. Many measured 4 inches in diameter, and I grew over 600 bushels per acre, or at the rate of 1162 baskets. I used it on strawberries and picked 8000 quarts per acre.

The above testimony should, therefore, be convincing.
Respectfully,

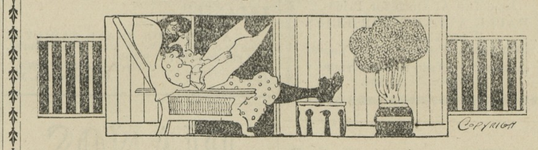

WILBUR W. HUBBARD,
CHESTERTOWN, MARYLAND
