SANDY BOTTOM DEPARTMENT STORE!

Rock Hall Items.

At the Oregon Medicine Co.'s show two diamond rings were given to the most popular young lady and baby by vote. Miss Amanda Hogans and Lloyd Maslin received the rings.

Lower Kent Fox Hunting Club entertained a number of Queen Anne hunter here this week. They had several good runs and bagged a live fox last Tuesday.

Last Thursday night the Rock Hall High School held a declamation contest in the Mechanic's Hall. The Literary Society rented the hall and invited the patrons of the school and all who were interested.

Mrs. Walter Hadaway has been very ill the past week.

The new school house commissioners will meet next week to select a site for the new building.

Ernest Thompson Seton has retired from scout wook. He was the organizer of the Boy Scout movement in this country and served as Chief Scout for four years. Before the Scout movement he was interested in boys' work and had the Seton Woodcraft Indians from which Sir Robert Baden-Powell founded the Boy Scouts. The movement has lost a very active and interesting man.

Josh Thomas has purchased an automobile from J. H. Sides, Chestertown.

Shad and herring have started their run up the bay. Quite a number have been caught the past week.

Max Alexander and J. Blaustein were in Baltimore this week.

Isaac Henry, son of O. H. Henry, Easton, Md., spent the week-end with Prof. Greenhawk. Mr. Henry is an assistant Scout Master in Easton. He was much interested in the Rock Hall Scouts.

Last night at the weekly meeting of the Scouts eleven badges were presented to Scout Puppe, Parsons and Hastings for pathfinding, pioneering, handicraft, bird study, carpentry, camping, chemistry, first aid and other scout work. The research work on these topics helped the boys in their school work.

Mr. Joseph Downey was in Rock Hall this week.

Bayard Parsons, Wellington and Markley Ashley, Joseph Downey, Jr., were among the boys attending school away from this town, who spent the holidays here on Feb. 22.

Massey Items.

Massey Grange 319, dispensed with the regular Monday afternoon meeting this week, but held an evening reception to friends of the members instead; the occasion being the anniversary of the birth of George Washington.

An attractive programe had been ordered by Lecturer Mrs. L. B. Wilkins, consisting of readings by Misses L. G. Newnam, E. C. Ranson, Stacia Haley, Mrs. Wilkins, S. S. Hurlock and F. Welen, Jr. The programme was interspersed wite music, and after its completion, the curtain on the stage was drawn disclosing longtables, which were really pretty in their decoration Ice cream, cake and coffee were served by the ladies; each block of cream bearing a cherry. Small silk flags were laid at each plate.

The candidacy of Thomas J. Donohoe, of the First District, is being discussed here, and tho' Mr. Donohoe has not yet announced his intentions, his many friends are seemingly taking the fact for granted that he will accede to their wishes and stand for Judge of the Orphan's Court, Mr. Donohoe enjoys an enviable distinction in this district, in fact in this life, as he is one of the few men against whom no one bears ill will and for whom everybody has a good word. This consideration alone is a criterion that factional feeling would not enter into his part of the fight were he to make his intentions known.

Massey is soon to lose one of its fair daughters, who will shortly enter an institution to study as a nurse, Miss Edith Maslin, daughter of W. B. Maslin, is the young aspirant for this honor.

Pomona Items.

Mr. Claude Blackiston and son have been visiting his relatives in Baltimore during the week.

Mr. and Mrs. Wm. J. Maslin spent the week-end with her parents, Mr. and Mrs. James Brown, of Baltimore.

Mr. and Mrs. Frank Shinn entertained quite a number of friends and relatives at their home at a five o'clock dinner on Friday evening.

Mr. E. C. Stafford's sale was largely attended on Thursday last.

An annual church supper was held at the Pomona parsonage Tuesday evening, Feb. 23rd. A large crowd attended and it was a great success.

Services at Bond M. E. Church tomorrow, Feb. 28th, will be as follows: 9.30 A. M., Sunday school; 10.45 A. M., preaching by the pastor, Rev. O. B. Rice. At Mowbray, 2.00 P. M., Sunday school; 7 P. M., preaching by the pastor. Prayer meeting at Mowbray every Wednesday evening at 7 P. M.

If Mothers Only Knew.

A toilet preparation of merit. Helps to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. 50c. and $1.00 at Druggists.

SPRAYING FRUITS NECESSARY TO SUCCESSFUL ORCHARDING.

T. B. SYMONS.
Maryland Agricultural College Extension Service.

The man who wins in the orchard business is the man who prepares for the harvest in the early spring. Trees should be pruned properly, and all dead wood and brush removed from the orchard. Both apple and peach orchards should be sprayed with the

SIMPLE SPRAYING OUTFIT.

concentrated lime sulphur at a dilution of one part of the solution to nine parts of water. Growers can buy this material or make it themselves using 100 lbs. sulphur and 50 lbs. stone lime, 55 gals. water and boil for one hour. The home-made solution had better be diluted at the rate of one to seven or eight parts of water.

The above treatment will control the San Jose Scale, and aid in preventing leaf curl, a disease especially bad on the Elberta variety of peaches. All spraying apparatus should be gone over and put in good shape for work. It is expensive to stop work in the field to fix up parts or mend hose, etc.

Be sure that the spraying is done thoroughly, that is, all parts of the trees should be hit, especially the terminal twigs for it is on the tender wood that the scale settles. Trees can be sprayed with this dormant solution until the buds begin to swell.

SHORT COURSE IN ROAD MAKING WILL BE HELD IN MARCH AT THE AGRICULTURAL COLLEGE.

In view of the generally unsatisfactory condition of many of our country roads at this time of year, the announcement of a short course in Road Making to be held at the Agricultural College in March is especially timely. It is especially planned to meet the needs of county engineers, road supervisors, foremen, inspectors and all others interested in keeping up our roads and in road improvement. This course will be given, beginning March 8, and will last through the week. The lectures and instructions in this course will be given by representatives of the U. S. Office of Bureau of Roads, the Maryland State Roads Commission, and of the Engineering Division of the Maryland Agricultural College. Like all other short courses offered by the College there will be no charge for the instruction, those attending having only to provide for their board and lodging. These may be obtained close to the College and at reasonable rates. For a more detailed statement and information as to just what is planned for in this course, those interested should write to the Dean of Engineering, Maryland Agricultural College, College Park, Md.

INCUBATOR OR HEN, WHICH SHALL IT BE?

A Question Every Poultry Keeper Must Settle For Himself.

ROY H. WAITE.
Maryland Agricultural Experiment Station.

We often hear people say, "I wouldn't use an incubator." "Incubators are no good," etc., but I wonder if these people ever stop to consider that there are two sides to the question. The old hen certainly has her advantages. Some of them are as follows:

1. More certainty of results in hands of the inexperienced.
2. Stronger chicks as a rule.
3. Require less attention.
4. No danger from fires.
5. Less cost when few are raised.
6. Less work when few are raised.

The incubator also has some advantages, for instance:

1. More certainty of results in hands of the experienced.
2. Chicks can be hatched at any season of the year.
3. Necessary where a non-sitting variety is kept.
4. Necessary where large numbers are raised.
5. Little danger from breakage.
6. No danger from lice.
7. No danger from rats and other enemies.
8. Incubator cannot mess up eggs.

Just suppose you have a setting of very valuable eggs and that you know how to operate an incubator properly. How do you think you would hatch them? Would you put them in the incubator in order to be certain of getting a fair per cent. of fairly strong chicks, or would you take a chance on the old hen and get more and stronger chicks or none at all if things went badly? Just think this over and you will see there is a good chance for argument on both sides. You will also see that it is a question to decide for yourself.

Cooling by Flame.

It is hard to appreciate that fire has widely different degrees of heat, for every burning blaze seems to have the extreme heat of fire, yet the flame of burning alcohol is actually used for cooling purposes in one make of searchlight because the alcohol flame is not nearly so hot as the point of fire at the center of the searchlight.

A good searchlight needs to have its lamp as small as possible, and the nearer it is to just a point of light, though still having intense light, the farther can its beams be thrown. The only way to concentrate the light is to raise the degree of heat of the light source, such as an electric arc, but intense heat is likely to result in melting the whole apparatus.

The above searchlight succeeds in highly concentrating the light source, and then to prevent this concentrated light from melting everything near it alcohol vapor is fed round it. The alcohol vapor burns of course, but as it naturally burns at a temperature far lower than that of the electric arc it acts something like the water jacket of an aufomobile engine and prevents the metal and glass of the searchlight from becoming excessively hot.—Saturday Evening Post.

Beautiful Kashmir.

It has been said that India is the brightest jewel in the British crown. But one cannot realize the brightness of the gem to the full until one has sojourned for a space in that veritable dreamland situated in the wedge of mountains forming the north center boundary of that peninsula. No other country in the world can boast of such a diversity of scenery or is so full of beauty spots as the valleys and uplands of Kashmir. Snow covered mountains, pine clad hills, rushing torrents, clear streams, limpid lakes and broad alluvial plains all combine to make up this wonderland, which forms the summer haunt of many jaded plainsmen from the sultry cantonments of India. Of late, alas, the ubiquitous globe trotter has discovered it, and his excessive supply of cash brings higher prices, silk socks and white waistcoats into a paradise where "boiled shirts" and other appurtenances of an evil civilization should never have been allowed to penetrate.—Wide World Magazine.

Yes, He Was In.

The collector was after a deadbeat, and there were rumors that he was in more serious trouble even than owing debts. The collector was told to get after him at once and run him down before anybody else got hold of him. So he chose a time of day when the deadbeat would be most likely to be at home and went to his house and rang the bell. The man's wife came to the door. "Your husband is in?" he said sternly—he made a statement rather than a question of it. She looked scared and answered, "Y—yes, sir." "I want to see him at once," he went on, very severely. "Why, you can't see him," she answered. "He's in, and yet I can't see him? I'd like to know why I can't!" "Because he's in for six months!" she sobbed, and shut the door in his face.—Argonaut.

Lyddite.

Lyddite, the powder that has enormous explosive force and can be fired from a gun easily carried about, does not, as has been widely supposed, take its name from a man, but from an ancient town near the coast of Kent, England, the town of Lydd, where there is a government artillery range, where the tests were made that resulted in the preparation of this explosive. Lyddite has extraordinary qualities aside from its explosive force, since its fumes are so suffocating as sometimes to be intolerable. Lydd shares the notoriety that attaches to the name of Dumdum, that other peaceful city in Bengal, where are manufactured the expanding bullets that attract so much unfavorable comment in war.

Penetrated His Disguise.

The last minstrel stopped at a back door and said to the housewife who greeted him:

"Give me something to eat, fair dame, and I will tickle your ears with a merry tale of romance."

"But why not tell me the tale first?" the dame suggested.

"No. I must have the food and drink before I talk."

Thereupon the dame slammed the door with the tart retort:

"You're not a merry minstrel. You're an after dinner speaker."—New York Globe.

Wellington's Reports Voluminous.

In the campaigns of the past our generals had much more time to write dispatches than now. Wellington, for instance, was able to write a detailed account of the battle of Waterloo on the night following its occurrence. And to read the whole of his dispatches in his various campaigns you would have to wade through twenty bulky, closely printed volumes.—London Chronicle.

The Worm Turned.

Coal Merchant—I say, Premium. I want to insure my coal yard against fire. What's the cost of a policy for £10,000? Insurance Agent—What coal is it? Same kind you sent me last? Merchant—Yes, it is. Agent—Oh, I wouldn't insure it if I were you. It won't burn.—London Express.

A More or Less Dry Remark.

"I've invented a boat made entirely of cork."

"Who will man it?"

"Oh, I am the cork's crew."—Philadelphia Ledger.

Without danger danger cannot be surmounted.—Publius Syruz.

POSITIVE PROOF.

Should Convince the Greatest Skeptic in Chestertown.

Because it's the evidence of a well-known Chestertown citizen.

Testimony easily investigated.

The strongest endorsement of merit.

The best proof. Read it:

Harry Hodgkin, merchant, Mill St., Chestertown, says: "I had various symptoms of kidney trouble. Pains through my loins annoyed me and the kidney secretions were irregular in passage. My supply of Doan's Kidney Pills was procured at Toulson's Drug Store, and they made me better in every way."

Mr. Hodgkin is only one of many Chestertown people who have gratefully endorsed Doan's Kidney Pills. If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask *distinctly for Doan's Kidney Pills*, the same that Mr. Hodgkin had—the remedy backed by home testimony. 50c all stores. Foster-Milburn Co., Props., Buffalo, N. Y. "When Your Back is Lame—Remember the Name.

SAVED A FOOT

January 11th, 1915.

WHITE FOOT REMEDY CO.,
Centreville, Md.

Dear Sir: Please send me by Parcels Post a large size can of White Foot Oil. I have been crippled for 15 years, had a bad running sore on my foot, and had decided, on the advice of physicians, to have it amputated. I heard so much about your oil that I thought I would try it, and it has done the work, it has saved my foot. It is the greatest healer I ever saw for a sore, whether on man or beast.
