THE CHAUTAUQUA PROGRAM.

Begins Monday and Closes on Sunday.—Only a Few Seats Remain Unsold.

They Will Cost \$2.50 Apiece After Noon on Monday.

The Chautauqua, probably the greatest entertainment in Chestertown or Kent county each year, will begin Monday at 2:30 P. M.

A review of the program will be enough to convince you of the pleasure to be gained from the affair. Following is the program, starting at 2:30 in afternoon and 7:30 each evening:

MONDAY.
Afternoon—Opening, conducted by the chairman of the Chestertown Chautauqua Committee; Series Lecture, Mrs. Gregory, "Cabin Days in Dixie"; Concert, McKinnie Operatic Company.
Evening—McKinnie Operatic Company; Impersonations, Ellsworth Plumstead; Illustrated Lecture, Charles Sumner Osgood, "The Panama Canal and the Panama-Pacific Exposition."

TUESDAY.
Afternoon—Series Lecture, Mrs. Gregory, "Readings from Southern Authors"; Concert, the Chautauqua Trio; Lecture, Mrs. Edith Elliott Smith, "The Relation of Town and Country."
Evening—Concert, the Chautauqua Trio; Lecture, Judge R. M. Wanamaker, "Partisanship vs. Patriotism"; Motion Pictures.

WEDNESDAY.
Afternoon—Series Lecture, Mrs. Gregory, "Scenes from Work and Play"; Concert, Original Strollers Quartette.
Evening—Concert, Original Strollers Quartette; Entertainment, Ross Crane, Cartoonist and Clay-modeler; Motion Pictures.

THURSDAY.
Afternoon—Series Lecture, Mrs. Gregory, "The Prose and Poetry of Dunbar"; Concert Imperial Russian Quartette.
Evening—Concert, Imperial Russian Quartette; Drama, the College Players, "Twelfth Night"; Motion Pictures.

FRIDAY.
Afternoon—Series Lecture, Mrs. Gregory, "Scenes from Cousin Kate"; Concert, Romano Orchestra.
Evening—Concert, Romano Orchestra. Lecture, Dr. N. McGee Waters, "Foundations of a Yankee Nation"; Motion Pictures.

SATURDAY.
Afternoon—Children's Play, presented by members of the Junior Chautauqua; Concert, Victor and his band.
Evening—Concert, Victor and his band; Lecture, Judge Ben Lindsey; Motion Pictures.

SUNDAY.
Sacred Concert, Victor and his band; Address—
The local Chautauqua Committee is as follows: Dr. H. B. Simmons, Chairman; Thos. S. Bordley, Treasurer; C. Norman Jefferson, Secretary; Guarantors, H. C. Hughes, D. D. S., H. Benge Simmons, A. Parks Rasin, Allan A. Harris, Wilbur W. Hubbard, W. Frank Jarrell, H. H. Klinefelter, H. F. Jefferson & Bro., George R. Rouse, Bordley & Sons, Fred G. Usilton, R. F. Parks, L. B. Russell, Wm. F. Russell, John D. Urie, Thomas W. Ellison, Jr., Wm. B. Cooper, A. L. Sparks, C. C. Jones, S. Scott Beck, Wm. W. Beck, Harrison W. Vickers, Jr., Thomas D. Bowers, James G. Beck, M. A. Pearce, Charles L. Dodd, Wm. M. Slay, Frank B. Hines, J. D. Baechus, Jefferson L. Smyth, W. Irving Walker, J. H. Sides.

The Junior Chautauqua will also be interesting. Just about a year ago the work of the Junior Chautauqua began in close connection with the bigger movement which we might call the Senior Chautauqua. To-day the words Junior Chautauqua are magic words for 10,000 children in the towns of seven States. All these children and many more, in these and five additional States are now waiting anxiously for the coming week of stories, games, folk-dancing and athletics, which is the other spelling of Junior Chautauqua.

Eggs are selling for \$1 per dozen in London, and for 24 cents a dozen in Baltimore. They have been selling at 24 cents in Baltimore for a month, while up and down the Delaware peninsula they have been selling for 26 cents for several days and the demand is very active.

Maryland Week.

The "Maryland Week" show will be held November 16, to 21, at the Fifth Regiment Armory, Baltimore. Maryland Week includes the Maryland State Horticultural Society, Maryland Crop Improvement Association and the State Beekeepers' Association. One of the interesting features will be the essay contest open to boys and girls of the state who attend the public schools. The subject selected for the boys is: "Why the Maryland Farmers' Boys Should Remain on the Farm." The winner will receive \$20 in gold. For the girls, the subject is: "How Social Conditions in Rural Life in Maryland Can Be Bettered By the Daughters of Maryland Farmers." The winner will receive \$20 in gold. Premiums are offered for the best wheat, corn, oats, hay, forage crops, grass and clover seeds, buckwheat, barley and tobacco, and all kinds of fruits and dairy products. With the prospects for a large crop of apples this year, it is expected that this display will be the largest in the history of the association.

Chestertown's new High street boulevard will make an excellent snow path for the racers this winter. Why not arrange a sleighing carnival during the winter and arrange prizes for the fastest horses. It will attract trade and help the merchants, besides furnishing excellent sport for the spectators.

TYPHOID FEVER

HOW TO PREVENT ITS SPREAD

ISSUED BY THE

State Board of Health OF MARYLAND.

When TYPHOID FEVER appears in a family the source of the infection must be looked for in drinking water or food taken within the preceding twenty days. The patient may not have been infected at home, but if a second case occurs this second infection will in all probability be traceable to the first patient. In a majority of instances the drinking water has become infected. Your first business, therefore, is to find out the quality of your drinking water.

You can do this by asking your local health officer for instructions about shipping us samples of your drinking water. The daily supply of drinking water should be boiled.

The infectious material of typhoid fever is produced in but one way. It grows always in the bowels and sometimes in the bladder. It, therefore, escapes from the sick person in the stools and urine. If we kill the germs in the stools and urine as soon as they are passed, there can be no spread of typhoid fever. These discharges should, therefore, be disinfected as soon as possible. You will need a large quantity of a good disinfecting solution.

RECIPE FOR A GOOD DISINFECTANT.
To four gallons of water add enough salt to make a strong brine. Put this in a five gallon demijohn or jug and add a quart of crude carbolic acid. Shake it up well and you will have a good disinfectant for stools and urine.

The crude carbolic acid, known as U. S. P. 90 per cent, is very good, and a quart will cost about 50 cents. There is a cheaper grade, known as a 36 per cent acid, which is nearly as effective.

About a pint of this solution should be put in the chamber or bed pan before it is used, so that the discharges will begin to be disinfected as soon as they leave the body. There must always be at least as much of the disinfecting solution as there is of the discharges, so that more of the disinfecting solution may need to be added after the discharges are passed. If the stools are thin and watery their disinfection will be accomplished in half an hour or so, but if the stools are thick or formed very much more time will be required. On that account it is best to have a covered jar or bucket into which the bed pan can be emptied, and to empty this jar only once in 24 hours. If the discharges cannot be finally thrown into a sewer, they should be buried in the soil at a convenient spot where there is no chance of their fouling a water supply. The discharges should never be thrown on the surface of the ground, for you will hardly be successful in killing all the typhoid bacilli, and you must not place them where those not killed by the acid may be blown about in the dust or carried away by flies to infect other people.

In spite of every precaution, those who wait on the sick person will get their hands infected, and it is, therefore, necessary to wash the hands every time one does any service about the patient's bed or body. Whoever waits on the patient must not prepare food or drink for other persons in the house, or if it is impossible to mind this rule one must most carefully and thoroughly clean the hands before performing any household duty outside the sick room. Good scrubbing with soap and water, and then rinsing well in fresh water will suffice for cleansing the hands.

If anyone else in the house falls sick within two weeks after the first patient, the probability is that the infection was ledged before the precautions were taken in regard to drinking water and the disposal of discharges. But if the second case occurs more than 20 days after the first case that will signify that we have made a mistake somewhere in our precautions.
