GASOLINE ENGINES!

As Agriculture approaches nearer and nearer to a real business, and it is doing that very thing to-day, the proper equipment for the farm takes on added interest. Success in farming to-day depends upon maximum production of quality products. Attainment of this result is absolutely impossible unless the farm equipment is up-to-date.

The really significant feature of power farming is that the application of power to the farm makes for advancement in methods. The Gasoline Engine is an innovation which opens up new vistas and avenues of thought, it starts the mind to running into new channels, it is a mental and a physical stimulus to the farmer.

Some of the many uses to which the engine may be put are:—First of all the WATER SUPPLY and this can be as elaborate as the desires of the pocket book may determine. Then there is the Cream Separator, Power Churn, Power Butter Worker, Ice Cream Freezer, Pump, Emery Wheel, Grindstone, Sausage Grinder, Wood Saw, Feed Mill, Corn Sheller, and the last thing we will mention here is something that is now possible on every farm—AN ELECTRIC LIGHT PLANT—that will furnish light for the house and all buildings.

Our I. H. P. Engine will do the pumping and other light work, and we sell it for the remarkably low price of \$36, and it runs on either gasoline or kerosene and is guaranteed for 12 months.

For more details about any of these things write or call and we will be glad to give you any information at our command.

Yours to serve
