A BIT OF ADVICE

First—Don't Delay. Second—Don't Experiment.

If you suffer from backache, headaches or dizzy spells, if you rest poorly and are languid in the morning, if the kidney secretions are irregular and unnatural in appearance, do not delay. In such cases the kidneys often need help.

Doan's Kidney Pills are especially prepared for kidney trouble. They are recommended by thousands. Can Chestertown residence desire more convincing proof of their effectiveness than the statement of a Chestertown citizen who has used them and willingly testifies to their worth?

Mrs. S. E. Kirby, Queen st., Chestertown, says: "About six years ago I used Doan's Kidney Pills, procured from the Stam Drug Co., with very good results. I was troubled with slight disorder of the kidneys and had backache."
Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Kirby had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Chestertown-Elkton Bus Line, Inc.

Owing to the Bohemia Bridge being damaged by ice and closed by the County Commissioners, we are compelled to run our busses on a different route and schedule to Elkton.

WOMAN IS HEAD OF CONNECTICUT POLICE

Dr. Valaria H. Parker of Hartford, Conn., has the distinction of being the first woman policeman who has been given supervision over other state policemen in the United States. Through the state council of defense she was recently given supervision of five state policemen and of the department of state police patrol about training camps in connection with military and naval centers in Connecticut. Her duty is to speak to thoughtless, careless girls and to attempt to get them interested in club activities. During three weeks in Connecticut 118 girls and women were interested in recreation rooms and clubs recently formed in connection with camp work.

The Girls' Patriotic League and the Y. M. C. A. have established recreation centers where the girls and soldiers may listen to good music, read good books, see moving pictures and dance.

"SHELL BLEW 'OUSE HOUT OF ME 'AND"

English "Tommy" Explains Reason for His Reverence for a Door Knob.

An English "Tommy" entered the Petrograd hotel, in the rue Caumartin, Paris, and sat down at a table next to four Americans. He looked very downhearted. When the garcon approached him he said:

"I shall have a glass of bittah."
"Comment?"
"A glass of bittahs."
"Je ne comprends pas," ventured the garcon.

"Naw, I wouldn't drink that if you gave it me for nothink," retorted the "Tommy." Then the Americans took him under their wing, and soon he had his glass of "bittah," which on second consideration he termed "type II." Just before the glasses were raised the "Tommy" took from his pocket a brown doorknob and placed it on the table in front of him. Before drinking the toast "To the Allies" he clinked his glass against the knob, murmuring "Dry to my hold, and just thereafter he sipped his "type II" in silence, but at each new rind touched his glass to the knob. The Americans exchanged winks after the second time.

One of the Americans finally reached for the knob, saying, "Let's see your pal's." "Dry to my hold," stopped him. "Don't tike a liberty with 'im," he said. Finally all the Americans left except the one who had spoken first to the soldier. There was silence and then "Tommy" explained, nodding toward the knob:

"He's very dear to me. I was ghassed and 'ad shell shock at Verdun. We got sepirted from our company, hand shells began fallin' near hus. The captain ordered hus to get hunder cover, hand we sprinted for an 'ouse an 'undred yards off. 'I'm a bit of a sprinter and 'I got there first, and just 'ad grabbed 'old of this doorknob when a bloody shell came along and blew the 'ouse hout of me 'and."

FOLLOWED CORN TRAIL

Woman Would Not Prosecute After She Got Back Chickens.

A man employed as a constable at the home of Mrs. K. M. Flocker at Pittsburgh, Pa., left suddenly recently. Mrs. Flocker immediately made a census of her chickens and found that two of the biggest had disappeared.

The Northside police were notified and Detective John A. Beck hurried to the scene.

After a few questions Detective Beck noticed a quantity of corn sprinkled in the yard near the gate. He opened the gate and found another pile of corn.

Beck followed the trail of corn through the alley to West Park and thence to a house in Merchant street, where the trail stopped.

He knocked at the door and found the pair of chickens in the house, he said. Mrs. Flocker refused to prosecute after the chickens had been returned and would not give the name of the person suspected.

INSURANCE!

Fire, Lightning, Life, Accident and Health

Best Companies, LOWEST Current Rates.
James G. Beck.

Russia Originally Democratic. Six hundred years ago it was the old Russia that arose out of Rurik the Norman's conquests, and had its capital at Kiev. There were czars and overlords after a fashion. But the real government of Russia was in the market place at Kiev and of every little town and village on the great wide steppes, where on the great days of the year the people gathered together, warriors, traders, women, too, chose their local officials. The original heart of Russia was democratic to the core.

Drying Foods. The process of drying as means of preserving food for storage possesses great advantages over canning and cold storage, while employing practically every advantage obtained by those agencies, says a food specialist. Dehydration greatly diminishes both the bulk and weight of the material, making it both easier and cheaper to store and transport. The food value is concentrated, while at the same time preservation is secured by the removal of the water.

Plant Life Changes. The life of plant varieties grown from seed, in their pure and original forms, is very short, notes a botanist. They soon pass in slightly different forms and the process is constantly taking place. So that in a few years a named variety is quite unlike the original, even though a direct descendant. Everything grown from one original seed is soon broken up into many divergent forms, and in some cases this takes in the first generation.

Could Live on Bananas Alone. The exotic but always accessible banana is essentially sanitary—no germs can touch it. Like the apple, it can be served raw or cooked to please the most capricious palate. Like the onion, it provides the highly necessary mineral salts. And, like meat and milk, it has a high fuel value—slightly less than the one, slightly more than the other. Man cannot live by bread alone, but he could by bananas alone—if he had to.

Does Not Know the Boy. Cardinal Newman, while familiar with the life and thought of the university man, admits his failure to know the boy. Out of the mouth of Charles Redding's father he extracts the confession that "there is no telling what is in a boy's heart. He may look as open and happy as usual, and be as kind and attentive, when there is a great deal wrong going on within."

Freak Cluster of Corn. E. D. Leonard of Clarendon, Vt., recently exhibited a freak of nature in a cluster of ears of corn numbering about 20. While all are small and only partly developed, the kernels on each are ripe and of normal size. The cluster resembles a bunch of small bananas. All the ears grew from a single stalk.

Great Rubber Producer. The Malay peninsula is the largest rubber-producing and rubber-exporting country in the world. Ten years ago the production was small, as compared with that of Brazil, which was then the principal source of supply. Its advent to first place as a rubber-producing country is due to its favorable climatic and soil conditions.

Tales Out of School. Willie Slimson—"My, but I thought you were a great deal bigger than you are." Fetherstone—"What gave you such an idea, Willie?" "Why, sister said that all you did was to take up room."—Life.

Acetylene Lighting. Acetylene lighting is expected to come into general use throughout Denmark as the government has appointed a commission to pass upon lamps offered for sale and carbide is easily obtainable from Norway.

Camera Locates Sunken Vessels. A powerful electric submarine camera that a New York man has invented is expected to get as much information about sunken vessels in a short time as it would take experienced divers days to gather.

"Charm" to Save Teeth. It was a Roman custom to hang beads of red coral on the cradles of infants and around their necks to "preserve and fasten their teeth" and save them from "the falling sickness."

Shower Bath and Massage. A Texan is the inventor of a combined shower bath and massage machine, brushes being revolved by an electric motor against a person standing within a tall cylinder into which water is sprayed.

Vain Promise Otherwise. She (to fiance)—"We must be very economical now. Promise me that you will do nothing you can't afford." He—"What! Do you want me to break off the engagement?"

Can Remove Birthmarks. Birthmarks and other superficial growths that defied chemicals have been removed with radium by English experts.
