Thrift Department

Food Production.—Mr. Wm. L. Amos of the U. S. Farm Service Administration, was in Kent looking into farm labor conditions. The Government is seeking information as to how much foreign labor will be needed to plant and harvest the crop this year in Kent.

The consensus of opinion among farmers is that there is abundant labor to do all farm work in Kent, but the only way to handle the lacker is through the Government official.

A joint meeting on food production and conservation is being planned by Dr. Cain, Food Administrator, Mrs. A. L. Harris, Home Economics Chairman of the Defense Council, Mr. Burrell, County Agent, and Miss Copper, Home Demonstrator, and Mrs. Wm. G. Smyth.

We wish to thank the county wide Mr. Burrell reports having seven clubs formed in Kent, approximately divided as follows: 25 growing corn, 25 growing potatoes, 30 growing pigs, 50 doing gain work.

Dr. Cole, from Department of Agriculture, has been assisting Mr. Burrell in a drive for prevention of hog cholera. Five meetings have been held, fifteen have been planned from one to three meetings in each district.

An effort was made this month to make our rat campaign include the entire peninsula, the Eastern Shore of Maryland, the Eastern Shore of Virginia and Delaware. Literature from Washington was obtained and we are endeavoring to the State Extension Service to send some one to demonstrate methods used by the Government for destroying rats. They requested us to return to the State Extension Service from them, as they were planning a state-wide campaign for destroying rats.

Quite a remarkable appeal was made at our monthly meeting by Mrs. A. L. Harris, Home Economics Chairman, to conserve food. She gave a list of foods that we can use now on the Eastern Shore of Maryland, how the diet can be varied and how we can make ourselves worthy of the confidence of Mr. Hoover, when he said "The American people who are placed upon their honor to sacrifice their food tastes and to limit what they eat of certain foods. If I did not believe this I would believe Democracy a failure."

A persistent report is going the county (possibly German propoganda) that Mr. Hoover is taking a salary of \$100 a year with his right hand and with his left taking in sixty million as his share of the food graft.

A paper was read by Miss Copper, Home Demonstrator, in regard to the use of cottage cheese as a meat substitute. She stated a pound of meat could be replaced by a pound of cottage cheese. Demonstrations in this will be held next month.

Mrs. Harris, who has lived a portion of her life in a city and a portion in a town, read a paper telling of her experience in feeding fifteen men in winter months, and the meanness and porkless days, two wheatless days and one meatless and one wheatless meal every day, and all are quite content. She has eggs every morning, although it takes three or four dozen a meal. For supper she uses fish, either fresh or salted, and meat only once a day. On meatless day she uses either chicken or a fat vegetable soup of plenty of beans and always a good nourishing, dessert made with eggs and milk. The one all important food to use in great abundance is all kinds of vegetables. Last summer she planted every winter vegetable that grows and every day serves three, four and sometimes five vegetables.

Mrs. Harris advises all farmers' wives to plant every vegetable that grows and not only one planting, but a rotation of planting, and can all that get better dried. They again in July plant every available space in your garden with root vegetables for winter and late in the fall plant spinners for winter and early spring use. Buy your seed from the most reliable source and save time and labor.

Mrs. Harris uses 25 per cent potatoes, corn meal and oat meal in bread and considers potato rolls the best bread made. She considers farmers' wives the most wasteful housekeepers in the land.
