This is the Post-War Maxwell of Which You Have Heard so Much

The Public which has so often expressed itself in favor of Maxwell cars (having purchased more than $200,000,000 worth to date) now finds a new delight in this wonderfull car.

Its a Post-War Maxwell.

The hundred and one things that keen engineers worked out in Maxwell laboratories during the war "have found their way into steel!"

Its a greater car than any of the 300,000 of this same basic design that now may be found on any of the world's highways.

You can search from axle to axle and most anywhere you will find bits of fine engineering development that will astonish you

You can locate them in radiator, brakes, clectric system, transmission, frame bonnet, body and even top.

Yet there is nothing that long road tests have not proven out, that ripe experience and level heads have not O. K'd.

Also equipped with Hot Spot ane Ram's-horn.

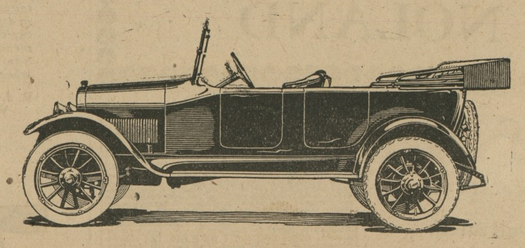

You pay $985 f. o. b. Detroit. You might easily pay $200 more and feel that you had a decided bargain.

Be among the first to drive a Post-War Maxwell. Get the most recent thing in a car.
