WILMINGTON

One Post-War Maxwell Built Every 1 1-2 Minutes

Only 60% of the demand for this magnificent Post-War Maxwell is being filled at the present time.

Yet eight great plants are working to capacity; and 13,000 men are devoting their best efforts to provide enough Maxwells.

Today, one Post-War Maxwell is being built every 1½ minutes of the working day

This is at the rate of 100,000 cars per year.

Imagine what what this gigantic production means to a purchaser of a Maxwell car.

Think of the gigantic saving in money which the purchase of millions of dollars worth of materials means, and how the list price can be made so low.

Think of the accuracy, the sureness of the design of each single part, to take a chance on such rapid and enormous movement of raw material through those great plants to completeb product.

Then think of the endorsement by the public which this great demand indicates.

The basis for this demand is represented in the good will of 300,000 owners of Maxwell cars before the coming of the Post-War Maxwell.

And the public bought $200,000 000 worth. They will buy $100,000,000 more in the next twelve months.
