Wild Geese Going South

A number of flocks of wild geese have been heard passing over Chestertown recently on their way to warmer climates.

Mr. Folger McKinsey, that sterling composer of poetry of the better kind in the "Baltimore Sun," has also heard this first token of approaching frosts and snows, and describes it in his inimitable and beautiful manner as follows:

I heard the wild geese honking on their
southward way last night,
A wedge of flying music in their witch-
like autumn flight,
Flying south, to keep the winter
On the broad savannahs there
In the sunlight of the Southland
And the fragrance of that air.

Against the silver twilight I could
mark them in their line,
And through the silent distance catch
that modulated chime,
That honking of the leader,
As that darting wedge of gray
Took the air path to the Southland
Where the winter sings of May.

In the ancient primal ages God creating all things best
Put that instinct of the seasons in the
wild fowl's downy breast,
And the golden chain of reason
Makes it easy for the clod
To go upward with the wild goose
To the gates that lead to God.
