Use Page "Lion Brand" Wovers Wire Fencing

Heavier GALVANIZED-mere elasticiny due to the wave and twist. No "v" CRIMPS to break the galvanizing. STRONGER because of stay-wire being ane solid unwrapped piece from top to bottom wire, locked by patented non-slipable knot to line wires, less susceptible to rust, deing mabe from BASIC OPEN HEARTH STEEL. Costs no more. Get your order in before the raise.

Use Our No, 1 Alfalfa H a in place of high priced DAIRY FEED. TRY a half ton and note increased production and quality. Others are saving, why not you?

Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

POULTRY NOTES

Items Of Interest That Will Be Well Worth Reading By Chicken Raisers

At this season of the year it would be well for our poultry raisers to watch closely their stock and see to it that th yehave sufficient shade and air at all times. It is easier to keep the flack well than to get them well once they are sick.

The Bramble Poultry Farm will put on a fall hatch August 20, which will come off September 10. They state a good many of their customers, early in the season, requested them to do so.

Poultry manure makes a fine fertilizer for asparagus—also for almost anything else.

Someone has said: "Today is the tomorrow you worried about yesterday and it didn't happen." Don't worry about what you would like to do—go ahead and do it.

The great fall poultry fairs are in sight. Go in and win!

Now is the time to single out those exceptionally promising youngsters and begin to guard and groom them for breeders.

Either extreme of weather is killing. When the mercury rises to ninety in the shade it is almost as paralyzing to Nature as when it is down to zero. Don't expect them to be at their best in extreme weather. Are you?

There is no business or occupation that does not involve more or less of waste. Certain kinds of work are peculiarly subject to wastefulness. Poultry husbandry is one of them. There are scores of ways in which profits may leak out if we are not constantly on the watch. A little here and a little there will mean much loss at the end of each day. We must be careful in feeding dry mash, or the birds will scatter it abroad and waste a large percentage of it. So with every other kind of food.

This word energy is one of the greatest words in the English language. It really means ability to do things. It has reference to different forms of power by which work is accomplished. It is said that there is enough energy in a single grain of radium to require 30,000 year to exhaust it. That is what we need in all business—energy—and the poultry business is no exception to the general rule.

One should cultivate interest in his chickens. If he don't he will find that his business will gradually wane. Enthusiasm is what makes the tasks easier.

We hear a lot about leg weakness. Perhaps a better word is bone weakness. It is found upon close examination that every bone in the body of a chicken inflicted with leg weakness is soft and pliable.

GARAGE REOPENED

Having returned to Chestertown and opened a garage on South Queen St., at my old stand, I will be pleased to see my old customers as well as new ones. I am prepared to do all kinds of car repair work and my charges will be moderate and all work guaranteed.

Work!

NO matter how hot the day, how heavy the bearing pressure or how tight the clearance between moving parts, put the right consistency of Polarine into your motor and it absolutely does the work—holds its body and maintains a firm, elastic oil cushion that keeps the metal surfaces safely apart. Three consistencies of Polarine, all of the same outstanding quality, take care of differences in motor design. Pick the right one from the Polarine chart and you can depend on its high-class work.

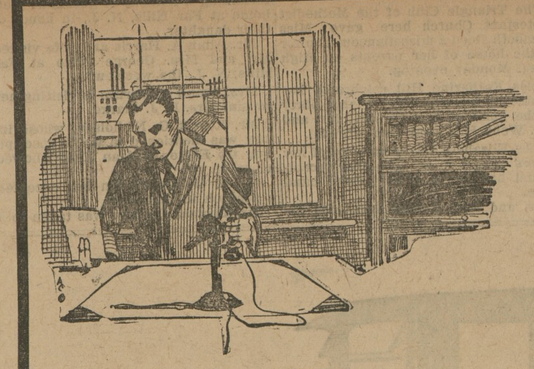

Polarine flows quickly—low temperatures or high—spreads evenly over wearing surfaces—outwears inferior oils, yet is reasonably priced by the gallon and costs much less by the mile. Years of experience the world over have taught us to combine easy flow, positive work, long wear and low mileage cost and give you *Polarine* for absolute lubricating satisfaction.

STANDARD OIL COMPANY
(New Jersey)

The Polarine Chart
specifies the consistency of Polarine that correctly combines flow, work, wear and low mileage cost for your particular motor. Consult it at your dealer's.

Polarine
THE STANDARD OIL

Say "Polarine"—not just "a quart of oil".

Cut Offs

If there is a "Cut Off" when a conversation is taking place over the telephone, THE PERSON WHO WAS CALLED SHOULD IMMEDIATELY HANG UP THE RECEIVER. The one who made the call should ask the operator to re-establish the connection, saying: "I was talking to ——— ——— and was cut off."

If the person who was called does not hang up his receiver, his line may test "Busy" and be so reported to the party who is asking to have the connection re-established.

The "Cut Off" may be due to a number of things: an error of the operator; a temporary disarrangement of the signal apparatus; the replacing of the receiver on the hook by mistake by one of the persons talking, or for some other cause.

Realizing the annoyance "Cut Offs" cause our patrons, every possible precaution is taken to prevent them. It will help us to give you better service if, when a "Cut Off" does occur, you will follow the suggestion made above.

The Chesapeake and Potomac Telephone Company

(Consult the information pages in the front of the telephone directory)

Let the Victrola furnish the music for your dances

Everybody who dances enjoys dancing to such excellent music—everybody dances their best to such perfect music.

It is the best dance music to be had anywhere, and it can be enjoyed in every home.

The Fox Trot, Maxixe, and all the other new dances are easy to learn and a pleasure to dance with the music of the Victrola.

Come in and hear some of the latest dance numbers, and find out how easily you can get a Victrola—$15 to $200.

KEEP YOUNG

People with bad backs and weak kidneys are apt to fel old at sixty. Many old folks say Doan's Kidney Pills help them keep young. Here's a Chestertown case:

Thomas Clements, retired farmer, 108 S. Mill St., gave the following statement August 16, 1916: "I suffered from attack of backache and whenever I bent, I had sharp pains in the small of my back. As Doan's Kidney Pills had been used in my home for several years, I took some and haven't been troubled since. I bought this excellent medacine at Toulson's Drug Store."

On January 25, 1921, Mr. Clements added: "Whenever my kidneys trouble me, I use Doan's Kidney Pills and they always do me a great deal of good. I have never found anything equal to Doan's."
