Use Page "Lion Brand" Wovers Wire Fencing

Heavier GALVANIZED-mere elasticiny due to the wave and twist. No "v" CRIMPS to breek the galvanizing. STRONGER because of stay-wire being ane solid unwrapped piece from top to bottom wire, locked by patented non-slipable knot to line wires, less susceptible to rust, deing mabe from BASIC OPEN HEARTH STEEL. Costs no more. Get your order in before the raise.

Use Our No, 1 Alfalfa Hay.

in place of high priced DAIRY FEED. TRY a half ton and note increased production and quality. Others are saving, why not you?

Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

TALKS to MOTHERS about THEIR BABIES

By DR. J. H. MASON KNOX, JR.,

Chief, Bureau of Child Hygiene, Maryland State Department of Health.

CARE OF THE BABY'S BODY.

Reprinted by permission of the Baltimore Sun.

HEALTHY babies should have a bath every day. A tub bath should not be given during the first week or 10 days until the cord is separated and the navel is dry. The bath is usually the event of the baby's day. The best time is in the morning before the second feeding. The face and hands should be sponged after the baby wakes before the first feeding and again at night on retiring. In very hot weather it is good practice to strip and sponge the baby several times a day.

The room temperature should not be below 70 during the bath. It is an advantage to give the bath before an open fire. The temperature of the bath water should be between 95 and 98 degrees until the baby is 6 months old, after which it is gradually reduced to 90 or even 80 degrees at a year old.

Washing The Baby.

THE face is washed with a soft cloth kept for this purpose. Then with the baby lying on the mother's lap, or preferably on a low table covered with a blanket, with the head to the left, the head and body are thoroughly soaped and the baby dipped in the warm water, the mother holding the baby with her left arm under the neck and shoulder, leaving the right arm free to sponge the body.

He should not be in the water more than two or three minutes. The baby is then lifted back to the lap or table and dried quickly by mopping with a soft towel. If the skin is irritated a bran bath will be found helpful. This is made by putting a handful of bran in a cheese cloth bag and soaking in the water until it is milky. After the baby is dry a little talcum powder may be dusted in the folds of the skin, but this should never take the place of thorough drying.

The baby's objection to the bath is usually due to the method by which it is given. Where the mother's movements are not too hurried, and the baby is placed into the water gradually, most babies enjoy the experience.

Eyes.

THE baby's eyes should be protected from strong light and from dust and wind. It is a wise custom to bathe the eyes of a baby up to two months with a weak boric solution, a teaspoonful of boracic acid to a glass of water in the morning, using a fresh piece of cotton for each eye. Soapy bath water irritates the eyes and is especially to be avoided. One or both eyes of the newborn baby occasionally exhibit excessive watering. This is due to the stoppage of the tear duct, which usually opens in a few days of itself. If not the doctor should be consulted. Of course, the doctor should be called in promptly if the eyes are red or swollen.

Mouth.

THE mouth of the young baby should be left alone. This is contrary to historic practice, but the delicate lining of the baby's mouth may be easily injured in attempting to wipe it. Nature takes care of all milk particles in the mouth which do no harm. When the teeth are cut they should be brushed with a soft tooth brush.

Nose.

THE nose may be kept clean with pledgets of cotton—cotton rolled in the fingers. No instrument should be placed into the nose, and if there is a tendency to excessive discharge a drop or two of liquid albolene may be instilled in each nostril daily.

Ears.

THE care of the ears is similar to that of the nose. Externally the ears are kept clean with a soft cloth. If wax cannot be removed with rolled cotton a doctor should be called. Probing the ear with a toothpick or an instrument is a dangerous procedure.

Scalp.

THE scalp is washed at the time of the bath. Perhaps it is well not to apply soap to the young baby's scalp more than two or three times a week. The fine scaly eruption, so-called "milk crust," is usually prevented by a little olive oil rubbed on the scalp at night.

Navel.

IF the navel bulges a pledget of cotton should be applied and held in place by the abdominal binder. If this does not correct the difficulty a doctor or trained nurse should be consulted.

Nails.

THE baby's nails should be kept short enough to prevent scratching. There is no reason why the nails should not be trimmed.

Buttocks.

IT is quite important that the buttocks should be cleaned with water or oil after each movement. Especial care should be taken to keep the movements away from the baby's genitals. The buttocks may be easily irritated by lack of care or insufficient rinsing of the napkins and from indigestion. This condition may be troublesome and a doctor should be consulted promptly.

The Genitals.

THESE organs should be kept scrupulously clean. Specific directions for their care should be obtained from the doctor.

ROCK HALL

Mr. Charles Brown, of Chester, Pa., is visiting his son-in-law and daughter, Mr. and Mrs. Graham Joyner, and Mr. Charles Ayres.

Miss Etta Hill and Mr. Walter Colison, of Baltimore, spent the week end with the former's parents, Mr. and Mrs. Herman Hill, Sr.

Miss Mary Gladsky, of Baltimore, was week end guest of Miss Edith Wachowiz.

Mr. and Mrs. John Cullison entertained over the week end the former's mother of Washington, D. C.

Mr. and Mrs. Louis Becker, of Baltimore, were guests of Mr. and Mrs. Leo Droll for a few days. Mrs. Fielitz is spending several days with her daughter in Baltimore and has with her her little grand-daughter, Elanora Droll.

Mr. Thomas E. Joiner was quite sick Saturday from stomach disturbance. He is now improved. Mrs. Joyner has word that her little grandson, Gayford Hunter, was operated on Sunday night for appendicitis and is yet seriously ill.

Mr. John Wood and Mr. Marion Downey motored to Oxford Monday where they visited the former's brother- in law and sister, Rev. and Mrs. Elderdice.

Mr. and Mrs. Maurice Willson entertained for the week end their son-in-law and daughter, Mr. and Mrs. Milton Hawkins, of Baltimore.

Mr. and Mrs. Joseph Hogans had as week end guests their son- in-law and daughter, Mr. and Mrs. Wilbur Clifford Leonard and Mr. Richard Goggage, of Baltimore. Miss Nellie Hogans visited Wilmington fair one day last week and is now spending a few days with her sister in Baltimore.

Mrs. William Roberts and children of Baltimore, are on a visit to her mother, Mrs. Ella Middleton, and other relatives.

Mr. and Mrs. Jesse Beaver and daughter, Estelle, Mrs. Donald Ross, Mr. and Mrs. William H. Cooper, of Worton, and Mr. and Mrs. Dodson Beaver, of Baltimore, were Saturday guests of Mr. and Mrs. Harry Hogans.

Mrs. John Jones had as guests from Tuesday to Thursday her sister, Mrs. William Luthringer, and daughter, Miss Anna Luthringer, of Cecilton. Their mother, Mrs. Katie Hague, accompanied them home for a visit.

Mr. and Mrs. Albert Moffett, Mrs. Spear, and Mr. Clingenback, of Philadelphia, were week end guests of Mrs. Moffett's parents, Mr. and Mrs. George Collyer, Sr.

Mr. John Lynn has returned from Coatesville, Pa., and will enter the senior class at the High School next Monday.

Miss Rose Williams, of Baltimore, was week end guests of her parents, Mr. and Mrs. Fred. Williams.

Mr. and Mrs. Howard Elliott and Mrs. Mary Shoemaker, of Baltimore spent Monday and Tuesday with Mr. and Mrs. Everett on The Haven.

Mr. Bayard Ayres has returned from a fortnight's visit to New York and will go to Huntington, W. Va., where he is teacher in the High School.

Mrs. Thomas C. Maslin has as guest her daughter, Mrs. William Sparrer, and daughter, of Seaford, Va.

Mr. and Mrs. Bernard Wilson are receiving congratulations on the birth of a fine little daughter last Monday.

Mrs. Sweetzer Green with her mother-inlaw, Mrs. Green, Sr., sisters, Misses Manola, Vera and Ruth spent four of five days at their summer home "Vemmerr." They were accompanied by a party of friends. Misses Vera and Ruth are recently home from a pleasant trip to Europe.

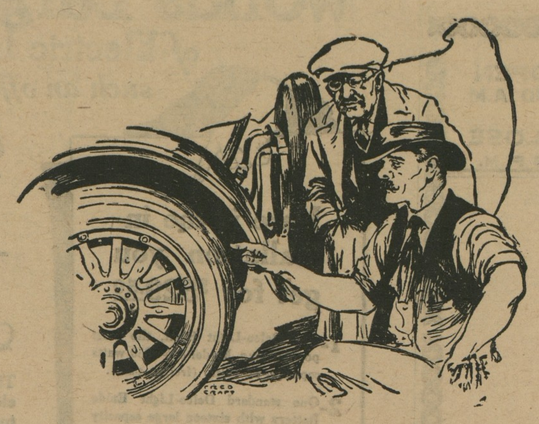

Mrs. Minnie Durding visited her son-in-law and daughter, Mr. and Mrs. Walter Bramble, in Chestertown and with them spent Thursday at Wlimington fair. She had a lovely visit.

Rev. and Mrs. Charles H. Reed are entertaining the former's mother, Mrs. Reed, of Atlantic City.

Mr. Samuel Wickes had a large party of campers who motored from Havre de Grace to his place for several days. They were friends of Mr. Jackson Maslin who formerly resided here.

Mr. and Mrs. O. P. Leary had as guests Monday their relatives, Mr. and Mrs. Clem and son, of Baltimore.

Lieutenant Maurice Kerr returns today to rejoin his commander at San Antonio, Tex.

"Keep those tires up!"

—says the experienced Fleet Boss. And he's right, absolutely. His long experience has shown him that it wastes gasoline to run on under-inflated tires—that a loss of 15 or 20 pounds of air pressure in the tires can cost you as much as 1 to 1 1/2 miles per gallon, whereas an extra passenger cuts off only 1/10 to 1/5 of a mile.

Polarine is built around a practical experience of more than fifty years which has shown us a thousand and one things that affect the performance of a motor oil or fuel. You can trust it as thoroughly as you can trust the finest tire or motor car.

STANDARD OIL COMPANY
(New Jersey)

Trust this live experience!

Say "Polarine" —not just "a quart of oil"

Polarine
THE "STANDARD" OIL

The Polarine Chart boils down years of experience with every kind of car and recommends the right consistency of Polarine for yours. Consult it at your dealer's.

Busy Lines

When you call a number and the operator reports: "The line is busy," this does not necessarily mean that the person you are calling is actually talking.

It may mean that someone else is calling the same number and the operator is ringing the telephone; it may mean the receiver of the telephone you want has been left off the hook; and it may mean, if it is a party line, that one of these things has happened to ANOTHER TELEPHONE on the line or that it is in use.

Should you receive a "Busy" report and the person called afterwards tells you that he was not using the telephone at that time, PLEASE DON'T CONCLUDE THAT THE OPERATOR GAVE YOU A FALSE REPORT. It may have been due to some of the causes mentioned.

Prolonged conversations contribute greatly to "Busy" lines. It will help us to give better service if lengthy conversations are avoided, particularly if either telephone is on a party line.

It will also be helpful IF THOSE CALLING WILL WAIT A REASONABLE TIME AFTER RECEIVING A "BUSY" REPORT BEFORE CALLING AGAIN.

The Chesapeake and Potomac Telephone Company
