Kindle Fire with Crutches.

For four years I have suffered with a very bad case of Rheumatism and have been compelled to walk on crutches; the doctors say that my case is chronic and incurable. I tried the Yager's Liniment and I must say that it is the best Liniment to relieve pain that I have ever used, and its action is prompt and effective.
JOHN ABERMAN, Clermont Mills, Md.

—:o:—

I have been sick with Inflammatory Rheumatism since November 1893, and have used a half dozen different kind of Liniments, but none of them helped me in the least, except the Yager's Cream Chloroform Liniment. I have used eight bottles of it and do not intend to be without it. It is the only thing that relieves me of pain. I can recommend it to anyone suffering with Rheumatism as the best pain reliever.
MRS. W. M. PARKER, Asbury, W. Va.

—:o:—

I have been affected with chronic Rheumatism in my back and hips for 16 years; have used various kinds of Liniments and so-called Pain Killers, but nothing I could do would relieve me. I was advised by a friend of mine to try your Yager's Liniment, and the one bottle relieved me, and was so well pleased with the first bottle that I purchased another, and will never be without it. Scrofula

Miss Della Stevens, of Boston, Mass., writes: I have always suffered from hereditary Scrofula, for which I tried various remedies, and many reliable physicians, but none relieved me. After taking 6 bottles of **S.S.S.** I am now well. I am very grateful to you, as I feel that it saved me from a life of untold agony, and shall take pleasure in speaking only words of praise for the wonderful medicine, and in recommending it to all.

CURIOUS INVENTIONS.

Take out inventive genius, says the American Artisan, and this would be a sorry world. A mere enumeration of some of even the lesser wonders that a wave of the magician's wand of Yankee ingenuity has given the word is full of suggestion. Here is a little wrinkle of invention that is simplicity itself. The larvæ of nocturnal moths have always been a bete noir to apiarists, as they have a great predilection for honey and young bees. Automatic machinery run by clockwork for opening and closing these hives would be quite expensive. Inventive genius tackles this problem and finds a ridiculously simple solution. When the hens go to roost, their weight on the perch may be utilized for actuating mechanism which shuts the doors of the beehives. When the shrill chanticleer welcomes the dawn of another day with his cock-a-doodle-do and the hens fly down to go worm grubbing, the doors of the beehives open again.

The two little strips of cork on the nose pieces of eyeglasses make them vastly more comfortable, as many of us can personally testify, yet optical science had shaken off her waddling clothes for quite a number of years before the cork strip came forward.

Other inventions that we have noted from a perusal of that most interesting volume, the Patent Report, are artificial hens' eggs, where shells are made by a blowpipe from a moist composition of lime and gypsum. The whites are made of sulphur, carbon and beef fat, and the yelks of beef blood and magnesia colored with chrome yellow. May we be delivered, exclaims the Artisan editor, adding, the good old-fashioned hen egg is good enough for us.

A month or two ago a patent was issued to a man who had a hat-raising contrivance. By contracting the brows your hat would be automatically lifted in case you met a lady acquaintance. For armless men this might be a good thing. Another inventor wants to go the Takamine process one better and give us a seaweed whiskey. If that would not make us see sea serpents, I don't know what would.

If another patented scheme works all right Oklahoma gentlemen won't make work for the St. Louis and Chicago coroners any more by blowing out the gas, as the breath tilts a delicately balanced electrode and gives an alarm in the office of the hotel. There is a pneumatic sole for shoes to lessen the jar of walking, and a process has been patented for weaving textile fabrics from thread spun from peat. A talking watch contains a miniature phonograph and cries out the hour when the stem is pressed. The idea of punching pin holes in eggs to keep them fresh by supplying the contents with fresh air has been patented. A washable paper, from which writing in ink may be removed after the lapse of any time, is made of rag pulp, glue and asbestos. The manufacture of it has been forbidden in Germany, because it might help fraud. Another patent is for making gold leaf so thin that four million sheets are required to make an inch of thickness. This sort of gold leaf is deposited by electricity on sheets of copper and is quite transparent.

MANY rejoice that they ever heard of "Goldey's," that well known Wilmington (Del.) Commercial and Shorthand College. Its short practical courses soon fitted these young people for good positions.

"Dr. M. M. FENNER, Fredonia. N. Y.

Dear Sir:—I had been suffering from Abscesses on my Lungs and Liver Disease for about three months. Coughed a great deal, had become nervous and restless and my flesh had wasted away. Had been treated by three different physicians without any material benefit. They finally advised change of climate to avoid Consumption, and in August last I had decided to break up my business here and go West in search of health.

At this time I was induced to try your Blood and Liver Remedy and Nerve Tonic. Once fairly under its influence I gained flesh at the rate of a pound a day.

After using 2 bottles of the Remedy, I was a well man and went about my business which I have continued uninterruptedly to this time."
