"50% of all motor wear occurs during the starting period"

... say automotive engineers

Measuring cylinder wear with a precision gauge—accurate to a hundred-thousandth of an inch!

*Motorists who know these facts will save money:

Motor oils refined by the usual methods have some oiliness and film strength, but they may form carbon and sludge, which lead to expensive motor repairs.

Other oils may form almost no carbon and sludge, but are so over-refined that they are robbed of oiliness and film strength they need to prevent motor wear.

Germ Processed Oil is refined to eliminate carbon and sludge troubles and then the Germ Process adds extra oiliness and 2 to 4 times more film strength than any straight mineral oil, as tests on the Timken machine have proved.

Here are the facts: Oils not Germ Processed drain back into the crankcase when your motor is idle. Bearings, pistons and cylinders are dry when you start. Even in warm weather your motor makes at least a thousand revolutions before the quickest flowing oil can reach all parts. Bare metal grinds against bare metal—destructive wear occurs.

Conoco Germ Processed Oil cuts down this costly starting wear! The patented Germ Process—adding concentrated oily essence to highly refined oil—makes it penetrate and combine with metal surfaces. That penetrative film, forming the "Hidden Quart", becomes part of the metal itself and never drains away.

Hundreds of dry-crankcase runs have proved the "Hidden Quart"

Only the oil with the "Hidden Quart" will stay up in your motor and cut down this starting wear!

lubricating value. Cars using Germ Processed Oil were driven 15 to 75 miles with the crankcase empty but without motor damage!

Germ Processed Oil protects your motor another way. All cars built since 1931 have greatly increased pressures and must have oil of extra high film strength for safe lubrication. Straight mineral oils have no more film strength than they had 10 years ago—some have less!

Conoco Germ Processed Oil, with 2 to 4 times the film strength of mineral oils, gives modern motors the lubrication they need.

Only Conoco Germ Processed Oil gives full motor protection—when you start, while you drive. You will cut motor wear if you use it!
