COLLIDED WITH SCHOONER

Thousand Fish Lost With the J. E. Watkins, of Rock Hall—Vessel Went Down When Hit by the Old Bay Liner Alabama and the Crew Were Saved by Use of Ropes.

The Old Bay Line steamer Alabama, Captain Lane, bound for Norfolk, and the schooner J. E. Watkins, of Rock Hall, were in collision at 7.30 P. M. Monday about one mile southwest of Seven Foot Knoll, which resulted in the sinking of the schooner. Captain Dolan and Dyson Urie, of the Watkins, were rescued by the crew of the Alabama, which threw lines to the sinking vessel, and the men were hauled on board the steamer just in time to escape going down with the craft. Captain Dolan reports that the schooner sank so quickly that they had no time to save any of their personal belongings, which included clothes and about $40 in cash.

After rescuing the crew of the vessel the Alabama proceeded to Norfolk, and arrived in the city yesterday morning. A purse was made up by the crew of the Alabama and presented to the rescued men to cheer them along until their return. The J. E. Watkins was bound from Rock Hall with a cargo of 1,000 shad. She was a vessel of 15 gross and 14 net tons register; 52 feet 8 inches in length, 14 feet 5 inches beam and 3 feet 8 inches deep. She was built in 1879 at St. Michaels, Md., hails from Baltimore port and is owned by Captain Dolan, who was also master.

The Lighthouse Inspector's Department was notified of the sinking of the schooner, and the tender Holly has placed a buoy to warn navigators of the obstruction which is in the fairway. Captain Dolan and Urie returned to Rock Hall Wednesday on the bugeye Edna Alice, and no arrangements have yet been made for raising the vessel.

PIERCE & BOLTON, Galena, is ready for Spring with a line of Men's hats, shoes, underwear, hosiery, &c. India linens from 9 to 25 cents; Persian lawns 15 to 25 cents; new line of waistings. A high grade talking machine free with every purchase amounting to $50.

BOARD WANTED.

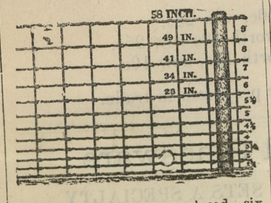
THE OLD RELIABLE

American

WOVEN WIRE

Fence

THE HINGE JOINT—Makes it possible for the fence to withstand sudden and severe pressure from contact with animals or otherwise, without bending the stays, the fence springing back to place the instant pressure is removed. It constitutes the most secure, lasting and efficient lock and without waste of material. Has broad surface connection with horizontal bars, which connection makes sidewise slipping of the stays next to impossible. Very materially aides adjustability, the fence readily conforming to the ground surface regardless of grade.



Tension curves are placed six inches apart in all horizontal bars, adding largely to the natural elasticity of the steel. Rendering the fence self-adjusting under varying conditions, such as contraction and expansion due to changes of temperature, hot and cold weather, climbing, sudden pressure and other strains.

Years of experience in the manufacture of American fence, attended with enormous sales, have demonstrated beyond question that we have this problem figured right and that the tension curve, with the hinge joint feature, keeps the fence right under all circumstances, every day of the year, and as long as the posts stand in position.

We can accommodate you with Field, Garden or Poultry Fence in many styles. Also, barb and smooth galvanized wire. We carry the largest stock of fence in the county.

Call and see our stock.
