The New Superior Grain Drill Is O. K.

Read what Mr. Harry P. Skipper Says:

Chestertown, Md., Oct. 15, '07.
Davis & Satterfield, Chestertown, Md. Gentlemen:—The Superior Grain Drill, with the new Fertilizer Finger Feed attachment, which I purchased of you in 1906, and which bunched my wheat so badly that I was not willing to settle for it until it was made right, I am pleased to say that the new "Y" spouts you put on this fall gave perfect satisfaction, and I herewith enclose my check in settlement for the drill. I would also say that the Superior Drill Co., through you, treated me as fair in this transaction as any man could ask.
Yours very truly,
HARRY P. SKIPPER.

We warrant this machine. You sign no note nor pay any money until your wheat comes up.

Perseverance

A steady accumulation of small savings deposited as they are saved in a safe and sound institution like this, where they will draw interest, will in a few years amount to a total of surprising magnitude.

At first the amount may seem small, and determined perseverance may be necessary to overcome discouragement; but after a year or two the accumulations will begin to be a stimulus to further saving, and you will find that with an increasing principal comes an increased interest.
