West Pratt Street

BALTIMORE, MD.

The restaurant is the oldest and most expensive of its accommodations of any in the city.

PHILIPPINES AT WORLD'S FAIR

Complete Exhibition of Island People and Industries Covers Forty-seven Acres and Is Independent of Larger Show.

Not even in the heart of Manila city could there be found forty-seven acres of Philippine territory as interesting as that amount of space covered by the islands' display at the World's Fair. Here is an exposition within an exposition, a little wheel that revolves independently of the larger one encompassing it.

Scores of buildings are filled with exhibits, native life is depicted by as many different villages as there are tribes on the islands, military drills are given by Philippine troops, and concerts are rendered by native bands. For its amusement features the Philippine exposition has the humorous Igorrote, who dines on dog meat, and visitors are entertained by Visayan actors and actresses. Nothing is lacking to make the show complete.

SOUTH ENTRANCE PALACE OF LIBERAL ARTS, WORLD'S FAIR.

The Administration building is a replica of the government offices in Manila, while the Art and Education building reproduces in miniature the cathedral within the walled city, even the mellowed tints of age being faithfully rendered. A section of the ancient but still serviceable town wall has been reconstructed to serve the double purpose of a gateway to the show and a museum of arms and war relics. The other main edifices are types of Filipino homes, being built of undressed timber, bamboo and rattan, with thatched roofs and broad verandas.

Then there are the tribal villages nestling under the trees, some of the houses perched high up among the boughs, others on piles above the waters of the Arrowhead lake, all of them actual dwellings fashioned of native materials by native workmanship and illustrating the manners, customs and pursuits of their occupants. Here are women weaving a coarse cloth on a rude hand loom, others making baskets, others tending irrigated fields of rice. One group of men are in village council, trying an offender according to their tribal laws; others are slowly moving in a circular dance to the thump of tomtoms and the clang of brass gongs; others, again, are smelting iron by the aid of a primitive but most ingenious bellows, the constituent parts of which are a bamboo tube and an airtight mop of feathers working therein like the piston of a syringe. And these are but a few of an almost endless variety of life pictures.

The ethnological problem is a somewhat complicated one; but, although there are no fewer than sixteen races represented among the village dwellers, the scouts and the constabulary, each race speaking its own dialect and following its own customs, all may be roughly classified into four groups—the true aboriginals or non-Malays, the pagan Malays, the Christian Malays and the Mohammedan Malays.

The first are the dwarf Negritos, with dark skins and woolly heads, wearers of scanty raiment, proficient in the use of the bow and poisoned arrow, a race of nomads and forest dwellers, pagans pure and simple. They live in their own stockaded village.

Next to them are the Igorrotes, whose origin is traced back to the first wave of Malay invasion. Here, again, we have scanty clothing, amounting almost to nudity, but copper colored skins, long wavy tresses, pleasant featured faces and fine physiques, even though the stature be small. Among these pagan Malays are the head hunters and the dog eaters. They are savages, yet have their code of laws and a knowledge of several primitive industries.

The Christian Malays, produced by the second wave of invasion, are represented by the Visayans, a tall and handsome race, dressing well, living in pretty homes, skilled in weaving, dyeing, basket making, hat making, wood carving and other handicrafts, musicians of no mean merit, the one group of natives who came early and thoroughly under the influence of the early Spanish settlers.

Very different are the Moros, who swept into the islands from the Malay peninsula last of all, bringing with them their Mohammedan religion, also a knowledge of gunpowder acquired with the Koran from the Arabs—fanatics like their teachers, pirates, bloodthirsty, treacherous and vindictive fellows, ever at war among themselves and with the whole outside world. Despite their ferocity they are a clever race, dress handsomely, have their sultans and their slaves and are expert seamen, while long continued pillage on the high seas has surrounded them with many of the luxuries and conveniences of western civilization.

The buildings of Agriculture, Forestry and Fisheries show all the varied natural products, also the extremely primitive processes as yet in vogue, while in the Women's building we are introduced to a number of native manufactures, including the beautiful fabrics from the jusi, banana and pineapple fibers. This information is collated in the Building of Commerce, where a unique and most effective method of exhibiting is followed. In one hall are samples of all the articles produced for export, among which manila fiber, of course, holds the chief place of prominence, while in a second hall are all the manufactures from every country that are imported and find a ready market among the populace. Thus the business man gets a dual lesson. He sees what he can profitably take from the islands, and also what he may profitably send to them. When it is added that a large number of representative Filipinos have been brought over to visit the Exposition and study American business methods and manufactures, it will be recognized that great benefit both to the islands and to the world at large must result from this work of mutual enlightenment.

CONCERTS BY MASSED BANDS

Prizes Aggregating $30,000 to Be Distributed at the World's Fair.

Never were musical events in America planned upon such an elaborate scale as those of the World's Fair. A series of concerts will be given by competing bands in contest for prizes offered by the World's Fair. These contests will take place in Festival Hall, Sept. 12 to 17.

Nine cash prizes, aggregating $30,000, are offered for the successful bands. The prizes are divided so as to give to the organization scoring the highest number of points $3,250; $2,500 will be given to the band scoring the second highest number of points and $1,500 to the one getting the third highest number.

The above division is made for bands in Class A, which consist of twenty members. In the B class $10,000 will be given in prizes—first, $4,500; second, $3,500; third, $2,000.

Class C, which includes bands of thirty-five members, will enjoy the division of $12,750. For the organization scoring the highest number of points a prize of $6,000 has been named. The second prize is $4,000 and the third $2,700.

Bands employed by the Exposition are not permitted to contest. All players must be bona fide members, and each musician must have been enrolled at least three months prior to the date of the contest. Each band must send to the bureau the name of its members and a nominal entrance fee.

Festival Hall concerts by massed bands will be given at 7:30 each day during the contest, in which all contesting bands will take part under the direction of a distinguished conductor. All bands entering must agree to play one concert in addition to the competing concert and massed concerts.

A separate programme has been prepared by the Bureau of Music for each class, and each band will play through the full programme of its class. The numbers in all three programmes are by eminent composers and are chosen with the view of bringing out the qualities of the bands performing them. The list of composers includes Wagner, Gounod, Offenbach, Verdi, Saint-Saens, Bizet, Strauss and Leoncavallo.

WEATHER AT WORLD'S FAIR.

Cool Nights and Delightful Indian Summer to Be Expected at St. Louis.

Usually the warmest month of the year, July proved to be one of the most pleasant of the World's Fair season, the average temperature being 67 degrees, a record lower than that made by either Boston, New York, Philadelphia, Cincinnati or Chicago. The weather bureau records show that the temperatures in St. Louis during July were just between the extremes recorded at New Orleans and St. Paul, cities located at great variance.

August in St. Louis is a month of cool nights, and September and October are the most delightful months of the year. It is that period known as Indian summer, when the foliage and birds linger to challenge the coming winter. Nowhere on the American continent is there a spot more delightful than the World's Fair city, a garden of blooming flowers and spraying fountains.

St. Louis, like all cities, experienced several hot days during July, but her highest temperature recorded was 93 degrees against 94 degrees registered by the thermometer at Chicago. On the same day the mercury rose to 96 degrees in Philadelphia, and scores of heat prostrations were reported from New York and Boston.

The relative humidity shows St. Louis to be about normal. Assuming absolutely no moisture in the atmosphere to be zero and absolute wetness to be 100, the relative humidities for July, taken from the records of more than twenty years, Boston shows 70.6, New York 72.2, Philadelphia 68.6, Cincinnati 64.6, Chicago 66.9 and St. Louis 66.3. The same degree of heat in two places, with different degrees of humidity, would cause it to seem the hotter at the point of greater density.

St. Louis may therefore rightly claim to be a summer resort this summer, positively one of the most comfortable and delightful places on the map.

Many Cannot Understand Why

after so many years doing business that

WILBUR W. HUBBARD'S FERTILIZERS

Are more extensively used year after ; year but the mystery is solved by a visit to our factory which is always open for inspection, and they see the quality of material on hand, and then by using, the result is once a customor always a patron.

We never had on hand a larger supply of high grade materials than we have now preparatory to our fall trade.

A fertilizer man whilst down at the factory a few days ago remarked while looking at a huge pile of Dis. Bone he had never seen more or prettier.

We manufacture Fertilizers and there may be as many as six others in America who make as good goods.

There may be factories as complete, but we do not know any one who strives to make a better goods for the money.

Notwithstanding the fact that all kinds of materials have advanced, we are peculiarly circumstanced to sell you this fall.

Inquire and you will find out that many of the best yields in the county this time were from HUBBARD'S. One gentleman claims to have gotten 34 bushels per acre from Bone Super, or 9 bushels more than from another. Mr. I. R. Leaverton says he is satisfied that the High Grade paid him best, and asked us to enter his order for 45 tons of it. Messrs. Wright, McKenney & Lowe say they never heard of better results and have placed their order with us again. We would therefore advise you before placing your order to call on or correspond with us concerning the matter.

Very truly yours,

Wilbur W. Hubbard,

Manufacturer of Standard Bone Fertilizers,

July 30. Chestertown, Md.

SPRING HAS COME!

— SO HAS —

HICK'S Stock of CARRIAGES and BUGGIES.

You will find them at his show room, rear of his Blacksmith and Wheelwright Shops on Court street. Also a line of
