

It's being whispered around that we are doing the Shoe business of the town.

Guess it's about right, too, judging from the number of people who are coming here for their Shoes.

We fully understand the "wherefore," and so does every Man, Woman aud Child who has bought Shoes here.

When we give our trade the best shoes their money can buy anywhere on earth, keep our styles right up to the hour, give special and expert attention to fitting, what more can we do?

Tie to this Shoe store and you'll always wear good Shoes.

Very truly yours,

W. AMBROSE CARROLL,

CHESTERTOWN, MARYLAND.

Hubbard's Fertilizers!

The leading farmers and canners through Pennsylvania, New Jersey, Delaware and Maryland speak in their praise, declaring them to be positively the cheapest, the safest, the best to use. Once a trial, always a patron. Wouldn't it be a good idea for you to try them?

For Hay—

Top dress your grass this month. We have a goods that works wonders for this purpose Try it and the cost per acre will cost less than you imagine.

Asparagus—

Are you going to do anything to it this spring? If so, we have the goods. It has Nitrate of Soda and Fish as the source of ammonia, and runs high in Potash and Phosphoric Acid. Some of the finest Asparagus grown in the country is with this goods.

For Corn—

You fertilize your wheat, why not your Corn? It will pay. We have many customers who use it year after year. We have one man in Delaware already ordered 70 tons. We have two more in Maryland who have their orders booked now for 20 tons each, and so on we could give them to you by the score.

Peach Trees—

Many orchards have been taken up the last few years, and peaches brought a good price last year, and don't you think it would be a good idea for you to feed your trees with our FRUIT GROWER, as it has given universal satisfaction. One patron last year claims to have gotten 30 cents per basket more for the same variety where it had been used. We have scores of testimonials concerning it.

Potatoes—

Well, you should use our High Grade Potato Fertilizer if you are going to plant, for this goods has been used for years in four States with the greatest success. It costs $80 per ton, but Mapes and some of the other goods costs $10 more, but we have never come in competition with other high grade Potato goods that ours has not been equal to any and superior to many. There is hardly a day in the last few weeks that some one from Kent or Queen Anne's has not dropped in our office and said: "That Potato goods of yours is the best ever used, and will want more this spring."

For Tomatoes—

Well, you have heard about our Peerless. Mr. Jacob Shriley says it is the best goods h ever saw for tomatoes. Mr. Stewart Graham writes where Peerless went alongside another goods one looked like manured and the other as if it had none and that Peerless yielded over one third more tomatoes.

Mr. B. H. Moore writes: "I used Peerless on 2 acres, sold 27½ tons at 12 cents per basket; netted me $198 40." D. F. Loose says one ton netted him $93.00 more than another ton of $18.00 goods alongside C. R. Dashiel says he would have it if it cost $50.00 per ton. Smith, Rouse & Webster, the great canners, say they never heard of goods spoken of more highly. We can furnish hundreds of testimonials. Many have told us their yield from it was four and five tons more per acre.

☞Now, if you want to sow OATS or top dress your STRAWBERRIES, plant SWEET POTATOES or need a goods for TRUCK, or want anything in the FERTILIZER line, please call on or correspond with us before making your purchases.

Very truly yours,

VICTORIA CATARACT

IT IS ONE OF THE NOTABLE WONDERS OF THE WORLD.

There Is No Other Falls on Earth Just Like It, and There Is No Possibility of Comparison Between It and Our Own Niagara.

It was on the 22d of November, 1855, that the friendly natives with whom he was traveling brought Dr. David Livingstone for the first time within sight and sound of the wonderful cataract on the Zambezi river, now known as the Victoria falls. Before finding it, the good missionary had journeyed for nearly two years, and from his point of departure at Kuruman, in Cape Colony, had traversed quite 4,000 miles of hitherto unknown country.

Today one takes the train at Cape Town on Wednesday, passes through Kimberley on Thursday, reaches Buluwayo on Saturday, and late in the afternoon of Sunday begins to see in the distance the rising pillar of mist from the great cataract.

The natives call it "Mosi-oa-tuni," meaning "the roaring smoke." Twenty miles away the spray thrown back from the depths of the tremendous cavern into which the river tumbles appears like a column of smoke rising from a burning village, and during the last mile of the railway journey the roar of the falling water becomes noticeable. Finally, when the edge of the chasm is reached, if the river is in flood, the eye and ear are assailed by a combination of phenomena that probably cannot be duplicated as marvels anywhere else on the planet.

The first question that is asked of an American who has seen this African wonder generally is, "How does it compare with Niagara?" There is no possibility of comparison. The two are as different as day and night. Niagara is a perfect picture in a lovely natural framework. Every point and line and curve of motionless rock, trembling verdure and gliding water is a touch of majestic beauty. Victoria is simply a phenomenon, a terrific gash in the floor of an apparently unending plain, which as one gazes simply swallows a river in a manner that produces almost a thrill of horror.

The Zambezi valley for a hundred miles or more in every direction from the cataract is a rough and broken plateau covered with low brush and stunted trees, with here and there an outcrop of somber basaltic rock, all thoroughly uninteresting. The herbage is but faintly green and the tropical sky only faintly blue. It is a hazy half tone landscape, wanting in clear cut lines in every direction and lacking, above everything else, that element we always unconsciously seek in a nature picture—life. The absence of this produces in the mind a feeling of loneliness and often of fear. Across this solemn scene appears a river that in flood time is perhaps half a mile wide. If a deaf man were following down one of its banks he would notice little but the quiet water and the odd looking column of smoke ahead. As this column was approached he would expect to see the river banks bending and the water flowing away to one side of the conflagration and might glance to the right and left to note the direction taken. But the panorama changes as he gazes. The river is no more, and there, where it should be, is only the brown plain, as lonely, brush covered and monotonous as ever. One must go twenty miles farther before the vanished water and the surface of the land again commingle, before it will be possible to walk along the bank in company with the river. So sudden is the transformation.

Meantime the pillar of smoke has resolved itself into a dense mist forced upward in terrible puffs from a yawning gash stretching directly across the bed of the river. This fearful abyss is every second swallowing thousands of tons of green and white water and belching up blasts of mist that rise hundreds of feet into the air and hurry away with the winds as if rejoicing at their escape from the inferno below. And somewhere, nearly 400 feet below, the entrapped river is fighting its way between sheer walls of black rock toward a narrow cleft in the eastern wall, whence it escapes, foaming and boiling, through the zigzags and curves of a deep gorge leading off to the eastward. One goes to an edge of this delivering chasm and looks down upon the tossing waters, ever pressed from behind by other floods struggling out of the narrow black gateway, and perhaps the most prominent mental sensation is that of thankfulness that even in such a grim and ghastly way nature has provided a means by which the fearful slit of a throat above that has swallowed the stream can disgorge it again without causing an overwhelming catastrophe. The Victoria cataract should be visited at least twice before one is competent to pass an opinion upon it. When the river is in flood (July) the scene is simply terrible. One sees nothing but an enormous sheet of water disappearing into the bowels of the earth with a noise as of mountains falling upon one another, while from the awful gash comes back in fierce gusts and swirls the foaming breath of the tortured element below. But in December, when the water is low, the edge of the cataract shows as a long, creamy film of lovely lace; the rising mist flows softly away through the little rain forest below the cavern's lip; the gigantic vault itself becomes a wonderful spectacle, a dream of neutral tints, a cave of beauty. Far down in its dark depths the waters, gliding along the rocky walls and bending gracefully around the corners toward the narrow outlet pass gayly and laughingly to freedom. For a time the demon of the cataract is sleeping.—Theodore F. Van Wagenen in Century.

CONTINUE

Those who are gaining flesh and strength by regular treatment with

Scott's Emulsion

should continue the treatment in hot weather; smaller dose and a little cool milk with it will do away with any objection which is attached to fatty products during the heated season.

BUTTER WEIGHT.

What One Observer Learned From a Visit to a Grocery.

Live and learn. I heard a respectable looking, motherly soul, making purchases for the family, say to the grocer, "Be sure to give me butter weight, now, for I've been a long time customer of yours." "Certainly, Mrs. MacLaren," he replied cheerily, "you are entitled to it if any one is." Yet she bought no butter.

"What is butter weight?" I inquired when she had gone. "Why, that's just a little sop we hand out to some of our old customers," said the salesman. "Instead of making an exact pound of anything they buy we make it a fraction over, which tickles them nearly to death. Of course we are particular to let them see they are getting more than their money's worth; hence we keep their trade."

I next asked how the store made up for this extra allowance. "That's dead easy," was the reply, "but as it is a trick of the trade I don't think we ought to tell everybody." "Perhaps other customers receive short weight?" "If they do, we don't let 'em know it."

"Maybe your prices are just a fraction over the market?" "Never! We sell cheaper than anybody." "Maybe your goods are inferior?" At that he quailed.

Referring to a dictionary, I learned that butter weight is an allusion to a custom of exacting seventeen or eighteen ounces or even more to the pound of butter, possibly on the ground that the water in it would soon evaporate and bring the pound down to sixteen ounces. In Scotland tron weight (twenty-one to twenty-eight ounces to the pound) was used in buying butter.—New York Press.

When Wagner Fled.

Richard Wagner, the composer, was an ardent republican in 1849. In the archives of Dresden there is a document setting forth a case of high treason against the musician. He was accused of having written to a friend a letter proposing to turn Saxony into a republic. "But whom shall we make president?" he asked. "I see nobody competent for the office except our present sovereign, Frederick Augustus II." Frederick Augustus does not seem to have appreciated the humor of the suggestion that he should doff the crown and content himself with the dignity of a republican president. For this flash of unconscious fun Wagner had to bolt to Switzerland.

Artificial Eyes.

The first false eye was a metal band which gripped the head and was fitted with a plate to cover the blind eye, covered with leather on which an eye was painted. Then came shells, like halves of nutshells, of gold, silver or copper, enameled or painted to resemble an eye and inserted under the eyelid. As an improvement upon these, artificial eyes were made of porcelain and at last of glass.

The Kind You Have Always Bought

Bears the Signature of Chas. H. Fletcher.

Not for My Own Interest

ENTIRELY,

But for Yours, Too.

I am going to make a change in store-room and location. I have fully decided to move from the store I am now occupying to a much better store and location, and will add to the Jewelry business a very salable line of goods. In order to carry this out I am compelled to reduce my stock that I have on hand, and the only way to sell it is to sell it for what it will bring, and therefore I have decided to have regular sales on Saturday and Saturday nights. Will sell my entire line of Clocks, Silver-plated hollowware, Rogers' Tableware, Domestic Sewing Machines. Will also sell Watches and Jewelry, mostly for ladies, Spectacles and Eye Glasses, etc. The sale will begin next Saturday, July 8th.

Read this advertisement carefully and bear in your mind that opposition is the life of trade. I ask the patronage of the public. I remain with all my strength to serve the public.

Respectfully,

A. LEVINE,

CHESTERTOWN, MD.

RUBEROID ROOFING!

When buying a Roof, buy the best, and that is the guaranteed *Ruberoid*, sold only by the undersigned. Half-ply Ruberoid will outwear any other one-ply make of Oid Roofing. One-ply Ruberoid will outwear any other two-ply make of Oid Roofing. *We stand ready for a test challenge.*
