HEARN MOTOR OILS

Are Uniform and Dependable because they are tested before they are sold.

The Emulsibility Test, to which each grade of Hearn Motor Oil is subjected, is one of the best tests to determine the lubricating value of motor oils.

Equal parts of Hearn Motor Oil and water are put into a bottle and shaken well. After settling, the oil rises to the top, but globules of oil are scattered throughout the water at the bottom. This clearly indicates a certain portion of the water has been absorbed by the oil. Water is always present in every motor, it cannot be kept out. Ordinary oil will not absorb this water. As a result the water breaks down the oil film on the frictional surfaces and allows metal to rub on on metal, causing scored cylinders and worn bearings.

Hearn motor oil absorbs moisture. Therefore water cannot destroy the film it maintains on the walls of the cylinders, and the metal parts of your motor suffer no injury. All Hearn oil is tested for its absorbing qualities before it is sold.

There are six grades of Hearn motor oil prepared to meet all requirements. You can secure the proper grade for your car for this season of the year.

There is a Hearn filling station convenient to you. The man at that station knows, and he will see that you get the correct grade of oil for your car.

Hearn "Y" Motor Oil is specially prepared for use in most makes of cars all-the-year-around.

Hearnoleum Products

The Hearn Oil Company manufactures tractor oils, greases and fuel oil.

Hearn Gasoline is reliable

When you buy Hearn Gasoline, you get a gasoline that has been rigidly tested before it is offered for sale. It is tested for ready vaporization, power, purity, mileage, uniformity and non-carbonizing qualities.

USE HEARN GASOLINE AND MOTOR OILS and you will get maximum service from your motor.
