Shoe Sale

Beginning Wednesday, August 29th, we will place on sale our entire stock of Summer Footwear for Men, Women, and Children at COST.

Our Fall Shoes are coming in and we have no place to put them—hence we are compelled to make tremendous reductions in price in order to move our stock quickly.

We do not quote any prices as you can have a better idea of the bargains offered when you come into our store; seeing is believing.

On account of the short cut in prices we cannot afford to run this sale but a short time, and therefore reserve the right to discontinue same at any time.

Whether you need shoes or not, it will pay you to buy now while sizes and selections are good.

MILLINGTON, MARYLAND

NOTE—Remington Game Loads are loaded exclusively in "Nitro Club" Wetproof Shells. Wetproof means just what it says.

Why Dealers Here in Town are selling so many Remington Game Loads

IT doesn't take sportsmen long to get the ins and outs of anything new that's offered them.

When Remington announced the Remington Game Loads last year, not all the men who wanted to try them could do so. Because it was their first year and there weren't enough to go 'round.

But those who *did* shoot them told the others, and *this* season there is a demand for Remington Game Loads that has never been approached in the history of the loaded shell business.

* * *

Whether you are already a Game Load enthusiast or have yet to shoot your first box—you will be interested in the facts about powder we uncovered in our Bridgeport tests on loaded shells. These are given in the panel at the right.

To the practical minds of the Remington organization, these discoveries indicated that there was just one thing to be done—

Fix a *safe* working standard of *velocity, pattern and penetration* for *each kind* of small game.

Make this standard *absolute*. And load just the right amount of powder to give it—whether it takes an eighth dram more or an eighth dram less.

* * *

That is the theory and practice of game loads.

Uniform shooting results—instead of a hard and fast loading formula. Powder varies—*Remington Game Loads do not.*

Naturally, you won't find the *weight* of powder indicated on Remington Game Load boxes—because the weight is *not fixed.*

You do not find the *name* of the powder because *Remington* takes full responsibility for the shell complete—*including the powder.*

Go to your dealer's. Get *one* box of Remington Game Loads and shoot them. We'll leave the rest up to your judgment.

REMINGTON ARMS COMPANY, Inc.—*New York City*
Established 1816

These are the Facts disclosed by Remington's Ballistic Tests

A—A given weight of the same kind of powder doesn't always give the same velocity, pattern or penetration.

B—Powder varies batch by batch—even the same kind and make. One batch, for instance, gives a velocity of 925 feet per second. Another may fall as low as 840 feet per second.

C—This is nobody's fault. Powder comes that way.

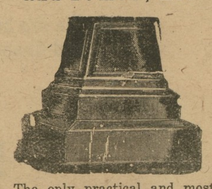

D—The man who buys his shells by the weight and kind of powder—often misses a lot of game and never knows why.
