VALVE-IN-HEAD Buick

Five Passenger Four-Cylinder Touring Car
The Standard of Comparison

A Car of Greater Utility

Thoroughly representative of the 1924 Buicks, this four-cylinder, five passenger Touring Car is new from end to end. Its new body, frame, fenders and radiator—its new Buick valve-in-head engine—its four-wheel brakes, all exemplify Buick's policy of building into its cars greater utility and satisfaction with each succeeding year.

The minute attention to those details that make for greater comfort and convenience is well expressed in the new windshield, new ventilator operated by a push lever, wide, low and tilted seats and compactly grouped instruments. This Buick four-cylinder Touring Car worthily maintains the Buick reputation—Standard of Comparison.
