The Tolchester Fair.

The premium list of the sixth annual "Kent and Queen Anne's County Fair" has just been issued. The fair is to be held at Tolchester Beach August 26 to 29. This fair has become firmly established, and in entries is equal to any of the State county fairs. Each day there will be racing events. Entries of trotters have been made of well known horses from Pennsylvania, Virginia, New York, North Carolina, Kansas, Connecticut, Delaware, Ohio, Michigan and Indiana. Eighty horses have been entered for the races. Liberal purses are offered. Prizes are offered for general utility, saddle, single driving to harness and coach horses; on cattle, to beef breeds and registered, Holstein-Friesians, Jerseys, Guernseys, Ayrshires and all grades or unregistered breeds of the above dairy breeds; pure bred sheep, swine and poultry; machinery and farm tools, harness and vehicles. Farm and garden products have three prizes—$25, $12.50 and $5—for best collections of fruits and flowers, dairy, domestic manufactures, culinary, preserves and a school department exhibition. The ladies' and school departments at the previous fairs have been unusually firm, and indications point to even better and more exhibits this season.

WHEN GORMAN PLAYED BALL.

"Father" Chadwick Tells of Sport in the Sixties.

The venerable Henry Chadwick, affectionately known in base ball and sporting circles at "Father" Chadwick, has written for the Baltimore News the following account of an old-time base ball game, in which Senator Gorman was one of the players:

"On looking over one of my scrapbooks containing the scores of games played in the sixties I found the following old score of a match between the Nationals of Washington and the Pastimes of Baltimore, played on July 19, 1865:

National.	O.	R.	Pastime.	O.	R.
Parker, 2b	3	5	Brown, c	4	1
A. P. Gorman, ss	3	4	Mallinckrodt, p.	3	1
Berthrong, c	3	4	Prestman, 2b	4	0
Hodges, 1b	5	2	Weidner, 3b	3	1
W. Williams, p.	5	2	Remmington, 1b	2	1
Prouty, l. f	2	5	O'Connor, l. f.	2	2
James, r. f	1	0	Mines c. f	2	2
Tappen, c. f	1	4	Griffith, s. s	4	0
Cromin, 3b	4	3	Gregg, r. f	3	1
Totals	27	35	Totals	27	9

"Of the old Nationals of that game the shortstop was the United States Senator-elect for Maryland; the centre-fielder was the now veteran proprietor of the Washington sporting goods firm of Tappan & Co.; the first baseman was Mr. Hodges, who is still in Government employ in Washington, and the team's old catcher, Harry Berthring, is now a artist in Boston. The pitcher, W. Williams, is dead, and I do not know the whereabouts of the other players of the Nationals. It was about that time that I first became acquainted with my old friend Arthur P. Gorman, who afterward became president of the National Baseball Association of the period. The Baltimore players of the old nine were not known to me."

Sprouted Corn for Stock.—*Makes One Bushel Equal Two.*—A Chicago man named Kammer claims that he has invented a device which will make one bushel of grain go as far as two in feeding stock, especially beef cattle. The invention is a simple one and costs but little to try it. Kammer's device consists of a large galvanized iron case, with drawers, to serve as receptacles for shelled corn, each drawer having a capacity of half a bushel. On the top and on four sides of the case is placed common moss, such as may be gathered in the woods. The moss is three inches thick, and is compressed so as to form a huge sponge for the retention of water. It is throughly dampened, and in this moist atmosphere the corn begins to sprout almost immediately. In four days the hard grain is converted into a mass of tender sprouts, fed by the softened pulp. It is then ready for feeding to live stock or poultry. The claims made for this process are: It increases the weight by the growth of the grain up to 100 per cent.; renders the grain wholly digestible and outritive; brings to the grain, by chemical changes, valuable food elements not ntherwise obtained; aids digestion of other foods with which the grown grain comes in contact; supplies the best tonic that can be given to animals; converts corn' the great stack feeding material, into the ideal food for poultry and all young growing stock, and supplies at all seasons of the year a food to all animals which is the equivalent of the nutritious pastures of summer.
