

It is much easier for a woman to confide in the average man than in the average woman. She knows that the man will respect her confidences and keep them to himself. He is strong, has more experience of the world and can help the woman who needs advice. There is every reason why women should not trust their delicate constitutions in the hands of unskilled persons. It requires a thorough medical education to appreciate and understand the womanly organism. When a woman has ills and pains that she cannot bear —when life seems dark for every woman, she should confide her troubles to a physician of standing in the community, or one who has a national reputation. Certainly it would not be the part of wisdom to confide in an ignorant person without medical education simply because she was *a woman*. There is every reason why she should write to some great specialist, one who has made the diseases of women a specialty for a third of a century, like Dr. R. V. Pierce, founder of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y. All his correspondence is held sacredly confidential, and he gives his advice free and without charge.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

## A SNOW EXPERIMENT.

**Frozen Vapor From the Action of Sulphide of Carbon.**

Two solid bodies, one yellow, sulphur, the other black, carbon, unite under certain circumstances to form a colorless liquid called sulphide of carbon, which must be handled with much precaution on account of its great explosive property. The soluble property of sulphide of carbon renders it valuable to take spots off garments. If its odor is more disagreeable than that of benzine or turpentine, it has at least the advantage of being dispelled quickly in consequence of the prompt evaporation of the liquid. There is nothing equal to it to take off spots of paint on clothes. It does not do it, however, without creating great fear in persons who use it for the first time, for they see on the very place where, to their great pleasure, the paint had disappeared a large white spot, the nature of which is hard for them to define, and the more they brush the more unsightly and the larger that white spot grows. Is then the garment lost? No, for fortunately after a few moments the spot melts away never to show again. It was snow and nothing more. The sulphide of carbon in evaporating takes heat from the cloth and surrounding air, and the result of that is a sudden lowering of temperature sufficient to freeze the vapor of the atmosphere.

Without operating on your clothes you may make the experiment in the following way: Fill a small vial with sulphide of carbon, taking great care to do it far from all flame or heated stove. Then close the bottle with a cork stopper through which you have previously bored a small hole. In this hole place a piece of blotting paper made up into a small roll. The paper must reach to the bottom of the bottle and about an inch above the cork. Within fifteen minutes you will see the outside of this paper covered with snow, the quantity of which gradually increases. The liquid has risen through the pores of the paper as the oil of a lamp through the wick. When it gets to the open air it evaporates, and water contained in the surrounding atmosphere, being brought to a temperature below 32 degrees, has been frozen. If you divide the paper outside of the bottle into several pieces you obtain flowers and most charming effects. You may make the experiment in summer and in the full rays of the sun. The result will be obtained then more promptly, evaporation being more abundant.

**First Stogies Made In Pennsylvania.**

"The first stogie was made by hand in the wilds of Pennsylvania," said a tobacco man of Allegheny City.

"The story which they tell once in awhile in West Virginia and which must be true is that the long cheroots derived their name from the town of Conestoga, Pa. An emigrant train of wagons was finding its way across the state, and a supply of tobacco was found at Conestoga.

"The emigrants got a lot of it, but failed to get any pipes and so could not smoke unless they made pipes themselves. Necessity is the mother of invention. You may have heard that remark before. Anyhow one of the men rolled a leaf of the tobacco in his hand and wrapped it with another leaf. That was the first stogie. Others followed his example, and they all called the article that they made a 'stoga' in honor of the town at which the tobacco was secured. That is said to be the true story of how the name 'stogie' originated."—Louisville Courier-Journal.

**The Word "Boodle."**

Late American dictionaries acknowledge "boodle" as a word. Dr. Murray quotes from an American paper of 1884, "'Sinews of war,' 'soap' and other synonyms for campaign boodle are familiar." There, however, "boodle" is explained as meaning only "stock in trade," kinship with the Dutch "boedel," a man's stock of business or household goods, being highly probable. Perhaps "boodle," meaning a crowd or pack, as in the phrase, "the whole boodle (or caboodle) of them," is the same word. In that sense "buddle" is found in the early seventeenth century. No doubt it is only a coincidence that there is an old Scotch word "boddle" or "bodle," meaning a twopenny piece, and derived from the name of the mint master Bothwell.

**It's Sometimes That Way.**

She was surprised when she heard of the engagement, and she showed it.

"Why, I was perfectly satisfied in my own mind that you liked Tom better than George," she said.

"Well, to tell the truth, I did," replied the engaged girl.

"But you say you are engaged to George?"

"Yes, that's true."

"Well, I don't understand it at all."

"Why, it's very simple. You see, George was the one who proposed."

**Not His Own Boss.**

"It's ridiculous for a young man to get married as soon as he comes of age," said the elderly bachelor.

"Think so, do you?" said Henpeck languidly.

"Of course. Why, he's scarcely old enough to be his own boss."

"Well, he isn't if he gets married."—Philadelphia Press.

**Experience.**

Junior Partner—I suppose we had better say in our ad. that we want a man of experience. Senior Partner—No. Advertise for a man without experience; then we can teach him something.—Puck.

Perhaps the bravest of the brave is the coward who will not run.—Philadelphia Bulletin.

# LIVER TROUBLES

"I find Thedford's Black-Draught a good medicine for liver disease. It cured my son after he had spent $100 with doctors. It is all the medicine I take."—MRS. CAROLINE MARTIN, Parkersburg, W. Va.

If your liver does not act regularly go to your druggist and secure a package of Thedford's Black-Draught and take a dose tonight. This great family medicine frees the constipated bowels, stirs up the torpid liver and causes a healthy secretion of bile.

Thedford's Black-Draught will cleanse the bowels of impurities and strengthen the kidneys. A torpid liver invites colds, biliousness, chills and fever and all manner of sickness and contagion. Weak kidneys result in Bright's disease which claims as many victims as consumption. A 25-cent package of Thedford's Black-Draught should always be kept in the house.

"I used Thedford's Black-Draught for liver and kidney complaints and found nothing to excel it."—WILLIAM COFFMAN, Marblehead, Ill.

HOW WE CATCH A COLD.

A cold is sometimes contracted while remaining inactive for a while in an uncomfortable room or a cold draft and by failing to sleep under like conditions. But most colds are caught while sleeping too cold at night. Deep sleep causes sluggish circulation which renders the system susceptable to change of temperature. To prevent colds, sleep under plenty of cover. To cure colds use Rydales Elixir, it lessens the severity and shortens the duration of a cold and prevents pneumonia Bronchitis and Consumption.

# Take Nelaton's Remedy and be Cured!

Here is a convincing proof that NELATON'S REMEDY, the guaranteed cure, positively cures Rheumatism.

Read the stories of those who suffered and were cured--then ask yourself why you should put off taking NELATON'S REMEDY

Remember that our guarante is wrapped around every bottle: "your money back if it fails to cure." At your druggist's.

Queenstown, Md., April 30, 1903.

It affords me great pleasure to recommend Nealton's Remedy to all sufferers of Rheumatism, and I always do so. My wife was a terrible sufferer for two years and was dropsical, not being able to do any work at all She was attended by several doctors with no result, and I expected her death at most any time. After taking one bottle of Nealton's Remedy she was greatly improved, and before finishing the second she could do all her work and is now a well, strong woman.

Yours respectfully, W. A. WRIGHT.
