RAY PEACH.

A Special New Variety—That has been thoroughly tested.

Ray—This peach is of the Chinese strain, a remarkable grower, so much of it is noticeable in the nursery from other varieties. It ripens just after Troth's Early; size of Belle of Georgia or Moore's Favorite; white flesh with red blush; a shipper. The original tree has borne 16 successive crops without a single miss, and the small orchard of 264 trees, budded from same tree, 7years old, has borne 4 successive crops that have netted over ($2,200) twenty-two hundred dollars. We have the exclusive stock of this variety, the first that has ever been ofiered, which we furnish at double price of regular variety of peach.

ALL SICK WOMEN

SHOULD READ MRS. FOX'S LETTER

In All Parts of the United States Lydia E. Pinkham's Vegetable Compound Has Effected Similar Cures.

Many wonderful cures of female ills are continually coming to light which have been brought about by Lydia E. Pinkham's Vegetable Compound, and

Mrs. Fannie D. Fox

through the advice of Mrs. Pinkham, of Lynn, Mass., which is given to sick women absolutely free of charge.

Mrs. Pinkham has for many years made a study of the ills of her sex; she has consulted with and advised thousands of suffering women, who to-day owe not only their health but even life to her helpful advice.

Mrs. Fannie D. Fox, of 7 Chestnut Street, Bradford, Pa., writes:

Dear Mrs. Pinkham:—

"I suffered for a long time with womb trouble, and finally was told by my physician that I had a tumor on the womb. I did not want to submit to an operation, so wrote you for advice. I received your letter and did as you told me, and to-day I am completely cured. My doctor says the tumor has disappeared, and I am once more a well woman. I believe Lydia E. Pinkham's Vegetable Compound is the best medicine in the world for women."

The testimonials which we are constantly publishing from grateful women establish beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. She asks nothing in return for her advice. It is absolutely free, and to thousands of women has proved to be more precious than gold.

Suicide of a Colored Man—James Brown, a noted colored man, residing between Starkey's Corner and Price's Station, near Church Hill, committed suicide sometime between Saturday last and the following Tuesday. Brown resided in a brick house built on a two or three acre lot owned by him. He was a number of years building his castle. He moulded the bricks, made a kin ,and burned them. He then began the construction of his house, which took two or three years, his only assistant being his wife, who carried the hod while he laid the bricks. During about half of time he was making and burning bricks and constructing his house he worked for farmers in the neighborhood. He began the construction of his home in latter sixties or early seventies and, after asiduous labor and years of delay he and his wife removed and lived happily together until her death, a few years ago. After her death Brown was left alone and he became despondent, little of his former self recognizable. One of his infirmities being deafness, which grew on him as age advanced. An incident of the extent of his deafness is illustrated by the following incident: About six years ago Brown was working for Mr. Dill in making sorgum. During the noon hour Brown retired to a secluded spot in the rear of a pile of sorghum stalks to eat his lunch. In the meantime the boiler exploded and killed a young man. Brown having finshed his meal came from his seclusion and not seeing the engine and boiler inquired what had become of it. He did not hear the terrific explosion. Brown was an industrious colored man and highly respected by all who knew him. Frequently since the blizzard Mr. Israel Woodring, adjoining whose farm Brown resided, and Messers. W. Cole and Emory Clough, near neighbors, looked after his comforts. He was last seen alive two weeks ago to day. The following Tuesday Mr. Cole went to Brown's home and found him dead with a bullet hole over his heart and a pistol by his side. Mr. Cole informed Justice J. H. Carter, of Church Hill, who summoned a jury of inquest, Dr. S. C. Dudley was the physician who examined the remains and the verdict was in accordance with the testimony of Dr. Dudley, death from a pistol shot believed to be fired by his own hands.

WEATHER FOR MARCH.

The first marked disturbances for March will be central on the 3rd, 4th. and 5th. These reactionary storms will culminate with rain and high winds on and touching the 5th., ending in snow storms over much of the country to the northward.

A sudden high barometer with quick change to boreal winds and blizzardous conditions may result in the northern sections on and about the 5th, but a rapid reaction to warmer will set in about the 7th, ending in general storms of rain, sleet and snow during the Vulcan storm period extending from the 7th. to the 12th.

The 15th. to the 17th will bring a marked storm period, rising temperature and general storm conditions, ending in wide areas of rain and snow. Another high barometer and March cold wave may suddenly slip in from the northwest from about the 17th to the 19th, but it will give away as suddenly as it came.

The indications are that tropical storms and hurricanes will reach the extreme parts of our south country about the 19th to the 22nd, notably on and touching the 21st, and that rain and high winds, turning to snow and very cold for the season will meet the tropical, equatorial storms from the northwest. A severe March blizzard over much of the country northward, is among the probabilities at this period.

A reactionary storm period will be central on the 27th, 28th and 29th. At this time the temperature will rise decidedly, the barometer will fall progressively from west to east, and general storms of rain and wind, turning to snow in the north, will pass eastwardly across the country, and followed by another decided rise of the barometer, northwesterly winds and much colder.

The month will not bring a maximum of cold, but much precipitation in the form of rain, sleet or snow will occur.

Goose Bone Science.—Mr. M. L. Wroten has hanging up in his office in Easton, Talbot county, the breast bone of a goose, by which he says he can tell the kind of weather that will happen in less than 14 hours. He can look at the bone at 5 o'clock in the afternoon and tell whether it will rain, hail, snow or be clear the next morning. He says that when rain or snow is coming the bone will become moist or dark in color; when the weather is going to be clear the bone is perfectly dry and white and when a drop in the thermometer is impending it will turn purple. It is necessary, he says to have a new goose bone every year. He has watched the different flocks of geese and always procured the weather goose for the past 35 years, and has never known it to fail to accurately indicate the character of the weather. In every flock of wild or domesticated geese, according to this authority, there is one goose which always takes the lead, and the others follow him wherever he goes. Upon this goose there is a peculiar mark which does not appear on any other goose in the flock, and this goose is known as the "weather goose." In the early part of the winter his goose bone indicated that there would be 29 snows this winter. Twenty-two have already occurred. He says there is a secret in knowing what bone to pick out of the "weather goose" as a weather indication, but he refuses to tell the secret. He has been offered $15 for his bone, but refused to take it, saying he would not sell it for $100. Many people visit his office daily to find out what weather will prevail the next day. He predicted the recent blizzard and day by day he gets true prognostications. He has no use for the weather Bureau.

Record Breaking Winter.—The present winter, according to the weather bureau, has been the coldest with more snow falls in this latitude since the bureau was organized over thirty years ago. The winter of 1904 05 is a record breaker. Up to and including last Monday there was 24 snow falls during the winter. The total fall is 40 inches so far. Last year including March the total was nearly 26 inches. The low temperature of the present winter up to this time very much exceeds that of all last winter, including March when we had very cold weather last year.
