Section 1. Be it enacted by the General Assembly of Maryland (three-fifths of all the members of the two Houses concurring), That the following section be and the same is hereby proposed as an amendment to the Constitution of this State, and if adopted by the legal and qualified voters thereof, as herein provided, it shall supersede and stand in the place and stead of Section 34 of Article 3 of said Constitution.

Hail to Our Bargain Feast!

What's an Oxford bargain? A good money's worth What's a good money's worth? Good leather, good making, good fitting, good looking and good wearing Oxfords for less than their value.

Do all the stores that are now shouting Oxford bargains give bargains? Some do, more that don't.

We Do, Anyway

Those that don't had better look out, as people know old styles and bad shapes and russets dyed black, when they see them. And we hear a lot of gossip going on these days. Those who have looked say no such Oxfords as ours are being sold elsewhere for anything like the money. If you will make comparisons

ELECTRIC BAIT FOR FISH.

The New York Aquarium's Supply and Where It Is Captured.

The New York aquarium, which is the largest and best equipped institution of its kind in the world, obtains its supplies of tropical fishes from the waters of Bermuda. Some of the rarest and most beautiful species are exceedingly hard to catch, persistently refusing to take a bait, and on this account it has been found necessary to resort to a very novel and ingenious expedient to effect their capture, an electrical contrivance which serves to stun the coveted specimen and reduce it to helplessness until it can be made a prisoner.

The device in question consists in part of a small and compact storage battery which is held in a leather pouch beneath the arm of the operator, who wades as quietly as possible through the shallows and invades, with as little disturbance as may be, pools among the rocks. He carries a long handled dip net, to the handle of which a wire is attached. On the end of the wire is fastened a small percussion cap of the kind used for exploding dynamite cartridges. It is the bursting of the cap that is relied upon to stun the fish.

Luckly for the hunter fishes have as much curiosity as land animals, and even the shiest one will approach a bait to look at it, though indisposed to attempt the slightest nibble. Accordingly the percussion cap at the end of the wire is concealed either by something eatable or by a bunch of grass wrapper around it. Mr. Fish wonders what it is, ventures near and has instant reason to regret his imprudence. The fisherman closes the circuit, the percussion cap is exploded, and the victim is rendered for the moment lifeless, though receiving no permanent injury. Promptly, by reversing the dip net, he is gathered in, and a few days later he finds himself swimming about in a tank.

The fishes from Bermuda are carried to New York on steamers, of course, and it is a curious fact that during the first twenty-four hours of the voyage they are liable to become quite seasick. —Saturday Evening Post.

POINTED PARAGRAPHS.

Some men work just enough to keep dirty.

Every one wants always to be able to work, but not always to have to.

If you don't like certain persons, how you hate to hear their money rattle!

Here is one sign that you are talking too much—when your listener tries to pull away from you.

After a man passes fifty it is impossible for him to get up any enthusiasm about anything but his troubles.

Ever notice how the big flies avoid fly paper? It is the same with the really big men. They are seldom caught.

You can follow directions in making a cake or cutting out a shirt, but there are no directions that can be followed successfully in managing a man. Somehow he is not like a cake or a shirt.—Atchison Globe.

Helping Him Out.

For years Squire Latham, of whom many amusing stories are told, was a resident of Bridgewater, Mass., and it was while he was living there that the incident occurred which is related below. It illustrates his habitual coolness and whimsical temper:

He was awakened one night by his wife, who told him she thought there were burglars in the house. The squire put on his dressing gown and went downstairs. In the back hall he found a rough looking man trying to open a door that led into the back yard.

The burglar had unlocked the door and was pulling it with all his might.

"It don't open that way, you idiot!" shouted the squire, taking in the man's predicament instantly. "It slides back!"

How Tortoise Shell Is Worked.

The soldering of two pieces of tortoise shell together is effected by means of hot pinchers, which, while they compress, soften the opposed edge of each piece and amalgamate them into one. Even the raspings and powder produced by the file, mixed with small fragments, are put into molds and subjected to the action of boiling water and thus made into plates of the desired thickness or into various articles which appear to have been cut out of a solid block.

Early Timekeepers.

The clepsydra, or water clock, was used at Babylon at a very early date and was introduced at Rome by Scipio Nasica about the year 158 B. C. Toothed wheels were added to it by Ctesibius about 140 B. C. Some writers aver that they were found to be in use in Britain by Caesar in the year 55 B. C. The only clock in the world is said to have been sent by Pope Paul I. to Pepin, king of France, in the year A. D.

Hair Raising.

Husband—I feel in the mood for reading something sensational and startling—something that will fairly make my hair stand on end. Wife—Well, here is my last dressmaker's bill. —Washington Life.

Many Meanings.

Traveler—Some expressions in the Chinese language have as many as forty different meanings.

Little Miss—Same way in English. "You amaze me. Mention one." "Not at home."

His Regret.

Blobbs—Buggins' wife says he is a model husband. Slobbs—Yes, and he used to be such a good fellow too.—Philadelphia Record.
