PENNSYLVANIA RAILROAD

Bulletin.

DREADNAUGHT CARS.

The nub of railroading is first-class equipment and reliable service. The Pennsylvania Railroad provides this for the public. For many months big all-steel coaches, built like Dreadnaughts, have been operated on all through trains. Their easy-riding qualities and steadiness of motion have been widely praised. The all-steel dining cars too have distinct advantage over the wooden ones. They are stronger and steadier, and the act of eating is made more enjoyable by the smoother movement.

There are also some steel Pullman Cars—Combined Parlor Smokers and Baggage—in the service now. Travelers like them. They have plenty of elbow room and they glide over the rails. The Sleeping Cars are coming. Some four hundred parlor and sleeping cars will be in use by Summer.

These steel coaches and cars are the strongest vehicles ever built for passenger transportation. They are fire-proof, break proof and bend proof. They represent the climax of safety and the perfection of comfort in railroad travel.

The Pennsylvania Railroad has always been the leader in all manner of improved equipment as well as in all methods of making their patrons more comfortable. This is why it is known and honored as The Standard Railroad of America

SATURDAY, MARCH 19, 1910.

Kent apple growers, owning and farming lands rich in apple-growing qualities and some of which lands produce apples that sell in Philadelphia for nine cents apiece, are marveling at the news that comes from Mesa County, Colorado.

John H. Jones, a prominent citizen of Dover, has received a copy of the Palisade Tribune, of February 12. The Tribune's first news articles says: "An Orchard Sells for a Good Price", and then goes on to say that Fred E. Bunte of Bushton, Kansas, that day bought the fruit farm of M. C. Boals, just west of Palisade, for $14,500.

There is probably nothing unusual about this—a farm well set in fruit selling for $14,500, but the next paragraph is a thriller to apple land owners here. It says:

"The farm contains a little over four and one-half acres, so that the price paid was a trifle over $3,200 per acre."

Now, with Kent growing or able to produce from her soil, apples that sell only a few miles from the orchads at a much higher price than can be commanded by Colorado fruit, the farmers are wondering what it is that makes the difference of from $60 an acre to $3,200, and that, too, in a country "two worlds away" from the big markets.

Shall We Advise Our Daughters to Become Farmers Wives And Why ?

Yes I do think we should encourage our daughters to become farmers wives when the time comes for them to want to start out in life for themselves. So I think we should teach our daughters as much outdoors as indoors and perhaps more so that they will prepare for country life. Of course we are intensely interested in our daughters, who they should marry and anxious to have them succeed, and in order to be contented and happy as well as prosperous it is necessary to have faith in one's occupation and I think farming is a good occupation, therefore I should encourage any daughters to become farmers wives.

She is also a violin pupil of Earl Drake, and having finished in elocution under Madam Marco, she gives a programme in which are artistically blended humorous, pathetic and dramatic readings, pleasing violin solos, and songs that reach the heart. Miss Bidwell entertained quite a large audience in this town last March and they were all pleased. She will make her next appearance Wednesday night, March 23, 1910, in Gillespie and Moffett's hall. Proceeds for the benefit of the Ladies Aid Society of the M. E. Church. All are cordially invited.
