

Dr. Papenfuse:

I came into the Archives today to photocopy my files for the archives collection and to return the dip drive to you. I separated the materials into two clam shells: one containing the majority of project 51 and the other containing the end of 51 and all of project file 99.

Thank you very much for the opportunity to work with you for the past two years. Although I am disappointed that I could not stay on to work on the State House book, I look forward to new experiences in Chicago. My best wishes to its success and of course best wishes to your family.

Yours truly,

*Anne M. Tria*
