CHANGE OF FRONT .- The North American, which has been singularly prominent in its denunciations of the President on account of the Warmade inevitable to us, if we desired to maintain our honor and integrity as a nation—has at last "come in." This objection is the only one that has enabled the enemies of the war measures ever to make a plausible show of opposition—vield that, and the opposition falls, or is kept up wholly by partisan malignity. It says, in introducing an article from a Southern paper:

"That Mexico now claims the territory lying between these rivers as a part of Tamaulipas a therefore under her jurisdiction, is true, but a Mexican claim need not necessarily be founded in justices. The DEMOCRAT. ican claim need not necessarily be founded in justice, nor can the republic get over the fact, that she has repeatedly made admission that the Rio Del Norte is the boundary between herself and the Republic of Texas. We have Texan, American, English and Mexican authorities proving that the Del justice, alike to the President, our nation, and the Hibernia. true ends of history, seems to require that they should be explained, as our Charleston cotemporary has done for us."
