ANTHONY & EMERSON'S PATENT DOUBLE ACTING ROTARY CHURN, peculiarly adapted to warm climates, as it produces butter as easily from sweet milk as from cream .- In bringing this effectual and simple churn into use, the the proprietors, feeling confidence in its capabil- to ities, do not hesitate to pronounce it the best n churn ever offered to the public. This churn is v on exhibition at

67 Calvert street, and 274 Battimore street. And in order to convince the incredulous and satisfy the curious, at twelve o'clock daily, a A CHURNING WILL BE MADE.

The public are invited to call and examine the machine, and see its utility tested. It combines the following qualities: 1st. It produces butter in less time than any other churn, making it and gathering it from sweet milk in from 5 to 12 minutes, and from

cream in much less time. 2d. It produces more butter from the same amount of milk or cream, than the ordinary method, as it does its work in a more thorough and scientific manner.

3d. It is the cheapest and most convenient churn ever invented, involving the true philosophical principles of butter-making. 4th. New milk, after being churned, is sweet and suitable for family use.

5th. Instead of feeding the calf with milk direct from the cow-churned sweet milk will answer every purpose. By this means the butter We offer it upon the following terms: If the

churn does not prove as recommended, it may be returned and the money will be refunded. We have constantly on hand and for sale five different sizes, \$3, \$4, \$5, \$6, and \$9, capable of churning at one time  $1\frac{3}{4}$ ,  $3\frac{1}{2}$ ,  $5\frac{1}{2}$ , 10 and 15 gallons of milk or cream.
