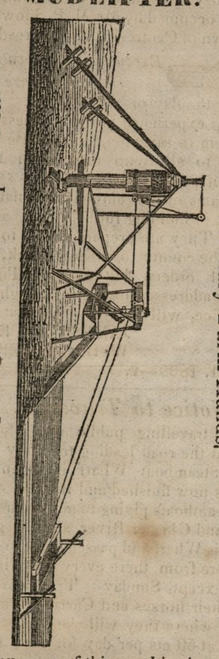
BRYAN'S AGRICULUTRAL MUDLIFTER.



Worked by two horses and will raise 15 Cart Loads per hour, only requiring one man to operate it.

A Strong and Durable Machine, which can be worked by ordinary Farm Hands.

THE purpose of this machine is to raise the deposit from the bottom of ravines, coves creeks, rivers or other places *Inaccessible to teams.*

This Machine raises the mud, brings it onshore, deposits into a hopper, under which a cart can be driven, and receives its load by means of a slide moved by the driver. by which all labor of shoveling avoided.

The bucket is made of the best boiler iron, and is so constructed that it dumps the mud into the hopper, and by reversing the capstan, adjusts itself and is carried out for another load.

By refering to a drawing and clear explanations sent with each machine any ordinary carpenter can put one up without difficulty.

But a few pieces of roughly hewn timber are required for the frame. Everything else complete with chain and rope enough to send the bucket 170 feet from the capstan, is furnished in Baltimore for the sum of $225 cash.

All orders promptly attended to, or information given at Larrabee's Foundry, *Cor. Front and Plowman Streets,*

CERTIFFICATES.

Centreville, Queen Ann's Co., March 10th, 1859.

A. S. GODWIN, ESQ., DR. SIR:

Learning that you are appointed agent for the sale of "Jourdan's Superphosphate of Lime," I take pleasure in saying to the public that I have used it for several years, on wheat and corn, with satisfactory results. I consider it the best Phosphatic manure I have used. W. S. TURPIN.

I have used extensively Jourdan's Ammoniated Superphosphate of Lime, for 2 years, upon wheat and corn. The effect was great and profitable in the increas- of both crops, and to me highly satisfactory, having proved a cheap and valuable fertilizer. I regard it as being among the very best concentrated manures in use.

CEO. W. CUMMINGS.

Smyrna, April 1, 1856.

I tried "Jourdan's Superphosphate of Lime" last fall, on wheat, to a limited extent, and found (at harvest) the wheat equal to where Guano on the one side, and manure on the other side, were applied. I tried to apply the same quantity (300 lbs. per acre,) of each, the ground prepared alike; the Guano sowed before planting, and the Phosphate of lime after, being the only difference; the soil sandy loam. I wish you to send me three tons more of the same article, for my wheat crop of this fall sowing, for I believe in the quality of it. WM. COLLINS.

Kent Co., Del., Oct. 4, 1855.

I last year furnished my tenants with twenty tons of Jourdan's Ammoniated Superphosphate of Lime, which was applied to the corn crop in the hills, and I was much pleased with its effects. The corn stood well and grew rapidly, and the crop was, I have reason to believe, greatly increased in consequence of the application of the fertilizer.
