

initials of Dr W. On the next  
 day Dr I. was found in the possession  
 of Dr W. found in will cases, various  
 fragments of bones, blocks of human teeth  
 & particles of gold - In the course of  
 the same day was found in a room corner  
 of the Dpe laboratory in a place where it  
 was hidden by one of the workmen as early  
 as Tuesday in the tea chest storage, kept  
 with tin on it - & a hunting knife on a bed  
 of iron.

3/3

Medical Examination. These remains <sup>all</sup> submitted to  
 Scientific Men. They were found to correspond  
 with the body of Dr P. & in no wise distinguishable -  
 - The head bones had not & the scapula lay from  
 them to the ankle. - The scapula were  
 these also belong to body with Dr P. corresponding  
 in height 5.10/ exactly those of Dr P. - he was a  
 man of beautiful form & shape - also as to hair.

And to this forensic evidence will be added  
 that there was no acquisition of the bones found with  
 being in the tea chest.

There will be some evidence to show  
 that the bones of the Cranium were  
 fractured before they were subjected to the  
 action of fire

3/3 Intro. There also the block of the Mericene teeth  
 of which two Dr I. & I. will be kept in  
 made for Dr P in 1846
