

The funds 29th by name at the college
have not often been left open under light
that we have them again on Saturday
& on Sunday

That the doors usually left open up
to that time were kept fastened - That the
key of another door usually deposited in
another place has been sent by Dr W

That Saturday, - which was clearing
up day, I went into Dr W's back room
to hear of his lecture room & find Dr
them. I attempted to go into the laboratory
when Dr W. and he went out the other
way through lecture room

Dr P. found Madeux's house near
the college, near the college & found
public house in evening papers - one of
which Dr W. took - Dr W. had been
a parishioner of Dr Francis Parkman &
the friendship between them on terms of some
intimacy -

The first disclosure of an
interview between Dr W. & Dr W. was made
by Dr W. to Dr Francis Parkman -

The family of course was
a state of great anxiety
