

She saw Dr P a Friday - that Dr
P. went to her repeatedly - & told
her of certain things of Dr P which
had been found - I am sure he
went to procure Stuart's tin box - &
told Dr P having been sent -
London - this is further proof

I also spoke of Mrs. Maria
Dickinson - that the body of Dr P was
found in Cal. & that the case had been
found.

That box by one answer to her
made strong & to the answer added
it self built - he knew his name in
box made before - some inconsistent
directing.

Another branch of evidence - case of moral
evidence - no man might expect to be
true to it on part of Dr P than it appears.

Noting time before our first
person himself - He has made
enquiries which might be considered with
his circumstances. There can't seem any
answer
