

There was another family who had been
in the hospital & perhaps he could
explain it - Then we were going
to the Medical College & perhaps he could
explain them - After that he did not
speak so much of his family. Dr W.
said he had nothing to explain &
1/3 would go to the College with us - The
officer helped him into the coach. -

Parker spoke about in the call on
Dr W. of his perspiring, & Dr W. said his
Extremities were freezing. I think rather
whom this was Dr Gay & not Parker,
but am certain that Parker went into the
call.

Walked down to the College. They
went in carriage. I arrived there just
as they got into the small laboratory at
Sturges. Dr. W. had an office in each
line of him holding him up. When I
came in they stopped & opened the private
room door & asked Dr W. for the key
the said Clapp had taken the keys
