

The ribs clasped over on to the thighs - I
 have known what were on top of the chest at
 that time. I can tell the spot where they
 did find it - it was the life thing which was
 then found. - There was a knife which fell
 out from the law - a large jack knife as I
 should call it.

There was a string which were round
 the body & legs, so as to lock them together -
 They have taken out the two & put with the
 other limbs. They are given in charge to the
 officers there. I saw them, two officers to
 charge all the time -

I saw the Medical Men then on Sunday.
 I believe no other dissections were made
 that Saturday afternoon.

I was at College the next day Sunday but
 when pair of pants were found - also a pair of
 slippers. They were found by officer Putnam. I
 think death was then, & I think Dr J. S. B.
 Jackson - the Dr Jackson who wears spectacles - saw
 them - Putnam found them in a closet
 leading from office to women laboratory. He
 found a red spot or two on them - which
 was thought to be blood. Dr Jackson told us

Blood
