

was with us in the lecture room as
in either of the laboratories. I think I
went to Dr A. when we wanted to look
into depositing vault which was before
we went to Dr W. room. I thought we
wanted Company with Dr Ainsworth before
we went to W. room

I don't know when the key of the
vault was taken

On Monday Dr W. was in the working
shop - fully much the same as
Tuesday. I did not notice any
difference.

At the fine visit we had known
I was going away. I think I was with
us when we knew that we were about
to go down stairs & I said Dr W was
in there & could make him hear.
Don't know what he said by way with
back laboratory

I handed Dr P. by making
examinations of beams of day he saw
him.
