

times, at 4:40 pm 11th that we made the
first search - if any thing I should say
it was after 11.

The 2^o Search was got through before
1/2 after 11 & 20 min before 12.

I don't know what I was in hearing
all the time Dr W was talking with
Cliff. My mind was taken up in
looking round to see what I could
discover.

Dr W directed my attention to the
shelf inside the small room for the key
I looked there but did not find any.

The key that Starkweather took was on
the wall on the outside - When the Dr
was told the key they had he'd not find
them Dr. said some one had taken the key
away. This was after he had said that
Cliff had taken the key.

I don't know what became of the key
in the tea chest.

The town was a small but town
such as butchers were - used as butchers
are for fat work.
