

After my interview with Dr P. Dps wrote
a letter to me I suppose to explain. I could
not read it & it never was read.

At subsequent period I was told that Dr
W. was about to give his Minerals to the College
if he could raise a certain sum of money. I
made no reply. Soon after a friend of mine
said he had a subscription. That was a rain coming
to give the Minerals to the College. I had a
conference with him. I arranged to subscribe 500
with understanding that it was to be a part of
what he had borrowed of me. My subscription
was taken & others were obtained & the amount
required was obtained. Soon after the Smith
came & said he wanted to buy me the balance &
did pay me 700 & the balance. I told the
gentl^e to take the bill of sale & catalogue & to
bring them to Dr W. & tell him I had let him
down all he could & I was entirely satisfied.
I need not bother on the amount due to me.

I know that Dr P. did not receive
pay for his debt out of the money which
was raised to give the Minerals to the
College. He told me so. I only know of Dr
P. looking to another fund for what he told me
