

bound & then he & Franklin were in
opened out lower body - thought & by -
- I asked Dr B. if there were parts of him - body
& then not under us any aspect, nor been
person for appearing natural and dignified. He
said no. I then asked L. if there
was any entrance to this place except through
the spring hole & the back door we had come through
She said No. there was not.

While they were in there they heard him
overhead. They heard out, saying they thought
Dr W. was there overhead. We went out on to
the floor above us. - They said yes, & Dr W. they
thought were overhead. - We came up on to the
floor of the entry. Dr B. went into the entry. The
officer I remained in I called while the officer's
went into the Laboratory to search for the
person they heard overhead. I waited there
till they finished their search, & they came
back & I asked them if they had found him
they said they had not - that they had
looked under the seats, behind the lecture door
but had not found him. I then
proceeded into the laboratory. I followed the
officer in - I went in & stopped near
the furnace - I heard the noise of the
removal of the cover. When over, I heard
