

I don't know who the officer was who
had a stick scraping the tar off.

+ We exp^d the perforation only, our opinion
was that the exposure it to see if it was
done with a knife. We saw no
indication of it was done with a knife.
My impression was that the perforation
was done with a can. That was what
I thought when we began the examination
I saw nothing to indicate that it was
not done in that way. I don't see
Examine the ribs.

I was 20 & 1/2 years of age when
that I saw the officer removing the tar
with a can.

Woodbridge Strong - I am physician, born - Boston
Jan 1820. I was educated with Dr Smith
& directed as often as I could. - I spent the first
winter in Boston in assisting. - ~~then~~
~~then~~ defecting & directed him - as to
let experience.

I have had experience in the
detection of bodies - human, by fire.
