

I was am couple of for dissection -

I had a pretty body given me & the  
Marshall on dissection - I dissected him rapidly  
I wanted to get rid of the flesh - There was  
old fashioned fine plan - I thought I had him at  
a large piece of wood & had flesh on it -

I began at night & set up all night &  
kept a rooming fine all night - It was  
not broken up by the middle of a day.

Good is a bad affair to have a body with  
good large fine of pituitary gland would be the best  
fine for being bodies.

Had to get rid of parts of body

Without preserving bad smell

I knew Dr P. & have even seen I have  
been in the City more or less. He was at one  
time a neighbor of mine, & after he left, he was  
then again; & I saw him often. Was, without  
doubt.

I saw him on Friday the 23<sup>rd</sup> Nov. - the  
day he disappeared. I saw him in Brown &  
about 12 1/2 o'clock. I was looking for him & wanted  
to see him - I was arriving down perhaps. He  
turned down for Brown on to the Green. He  
was coming up for the first.

I was at the Medical College the  
Tuesday after the remains were found
