

who cut up that body had even had a knife
as his tool for the purpose of anatomical
dissection.

Dr. Charles J.

Dr. Charles J. Jackson - An Anatomist: I was one of the
cads to the college upon the remains were found.
I was then Saturday open on 1. I went with Dr.
Morton Jay & visit Dr. Lewis there. Dr. Lewis
made some arrangements for the examination
Dr. Lee & myself took the chemical part of the
examination. We were shown the remains of a
human body & the contents taken for a small copy
of remains - The remains of body were put
into the hands of the physicians, but I took observation
of the remains before they took them. - Did we then
they had been used for anatomical purposes. The
manner of opening the body I thought indicated some
knowledge of anatomy - the flesh had been taken off body
when union of the cartilage with the ribs - & the
removal of the breast bone - No hacking about
the legs - or the thigh -

I have the testimony of Dr. Lee & Stone
& agree generally with them

I was well acc^d with Dr P. He was a
tall slender man - I thought tall & thin
broad in the pelvis - he was a fine
