

It was evident that there had been
high temperature in the furnace.

I then knew the dog for whom I
visited him in a friendly way. I saw
Kunzi, Gologu, in the Museum at College
for the apartment. - The person college was
occupied.

This Kunzi was shown in a group
at College - found oil oozing out of the
teeth. The oil & whitening was then put on
it was shown me on Monday & Tuesday.
Recd. let them regard it as of importance
The cleaning was not dry on it. My
was not called to the handle.

Dr P. was above my light - a little
taller. I am 5.11 & little over

The dog would have come off
bottom of burning flesh in that furnace.

I don't think he extracted all the gold
which could have been extracted - There more
could have been obtained from the fine ore.

I think there was 1/2 part of ash & 2 parts
underneath of Cetracite coal.

X. I should not have said this was Dr P.
I had not known for some time

Sea Salt is quite common in Poland
in the form of human sweat - only a very
small quantity. - I should not conclude
